THE PROBLEM

Need for an Fiverr Clone Solution

With the increasing trend of remote work, online freelance marketplaces have become more popular, as they offer a platform for freelancers to showcase their skills and offer their services, while clients can find talented individuals for specific tasks and projects. One of the most successful platforms in this regard is Fiverr, which has been operating since 2010 and has grown to become a leading player in the industry.

However, with the increasing demand for freelance work, there is a need for more options and features in online freelance marketplaces. Some clients and freelancers may prefer a platform with unique features and functionalities that are not currently available on Fiverr. Additionally, having a new platform with similar functionality as Fiverr can provide healthy competition and more options for clients and freelancers in the market.

Therefore, the need for a Fiverr clone arises, which offers a similar user experience, security, scalability, and revenue-generating opportunities for the client, while also providing some unique features that differentiate it from the original Fiverr platform. These unique features could include more personalized profiles, enhanced messaging systems, better project management tools, or specialized categories for specific industries or services.

To create a successful Fiverr clone, a skilled development team is required, who can build the website from scratch, using modern web development technologies and best practices. The website must be user-friendly, secure, and scalable, with features such as messaging, payment processing, and a review system, and should have a responsive design that works well on desktop and mobile devices. The website should attract a large user base and generate revenue through a commission-based system where the website takes a percentage of each transaction.

Effective communication between the development team and the client is crucial to ensure that the project stays on track and is delivered on time. The ultimate goal is to create a successful Fiverr clone website that provides value to both freelancers and clients and generates sustainable revenue for the client.

Solving Issues.

SOLUTION OVERVIEW

Technology meet Creativity.

Fiverr clone is an online marketplace platform that allows freelancers to offer their services and clients to hire them for specific tasks and projects. The clone is modelled after the original Fiverr platform, but with unique features and functionalities that cater to the needs of its users.

The Fiverr clone platform typically operates on a commission-based revenue model, where the website takes a percentage of each transaction made between the freelancer and client. The platform typically offers a range of services across various categories, including graphic design, writing and translation, digital marketing, programming, video and animation, music and audio, and more.

The Fiverr clone platform offers a user-friendly interface that allows freelancers to showcase their skills and expertise through personalized profiles, portfolios, and ratings and reviews. Clients can browse through the various services offered and hire freelancers for their projects based on their needs and budget.

The Fiverr clone platform typically provides a messaging system that allows clients and freelancers to communicate and negotiate project details before and during the project's execution. The platform also typically provides a payment processing system that ensures secure and hassle-free transactions between the client and freelancer.

Fiverr clone platforms may offer unique features that differentiate them from the original Fiverr platform. For example, some clones may offer more personalized profiles and project management tools, while others may cater to specific industries or services.

In summary, Fiverr clone is an online freelance marketplace platform that offers a similar user experience as the original Fiverr platform but with unique features and functionalities that cater to the needs of its users.

CUSTOMIZEABLE.

In addition, the Airbnb Clone is highly customizable, allowing businesses to tailor the platform to their specific needs and requirements. Whether it's adding new services, integrating with third-party systems, or customizing the user interface, the platform can be easily customized to meet the unique needs of each business.

KEY FEATURES

The Obvious

A Fiverr clone is a website or platform that aims to replicate the functionality and user experience of the original Fiverr platform. Fiverr is a popular online marketplace that connects freelancers with clients who need their services. The platform is known for offering a wide range of services across various categories, including graphic design, writing and translation, digital marketing, programming, video and animation, music, and audio, and more.

A Fiverr clone typically operates on a commission-based revenue model, where the platform takes a percentage of each transaction made between the freelancer and client. The percentage may vary depending on the clone platform, but it is usually a fixed percentage of the total transaction value.

The Fiverr clone platform offers a user-friendly interface that allows freelancers to showcase their skills and expertise through personalized profiles, portfolios, and ratings and reviews. Clients can browse through the various services offered and hire freelancers for their projects based on their needs and budget. Clients can also leave feedback and ratings for the freelancer after the project is completed, which helps other clients in their decision-making process.

The Fiverr clone platform typically provides a messaging system that allows clients and freelancers to communicate and negotiate project details before and during the project's execution. The messaging system ensures that all project-related communication stays within the platform, which enhances security and privacy for both parties. The platform also typically provides a payment processing system that ensures secure and hassle-free transactions between the client and freelancer. The payment processing system may offer various payment options, including credit/debit cards, PayPal, and other online payment systems.

Fiverr clones may offer unique features and functionalities that differentiate them from the original Fiverr platform. For example, some clones may offer more personalized profiles and project management tools, while others may cater to specific industries or services. Some clones may also offer additional features, such as dispute resolution systems, social media integration, or advanced search and filtering options.

Key features of an Fiverr Clone:

1. User-friendly interface: A Fiverr clone platform should have a clean and easy-to-use interface that allows users to navigate the site quickly and easily.
 2. Categories and subcategories: A Fiverr clone should offer a range of categories and subcategories to help users find the services they need.
 3. Freelancer profiles: The platform should allow freelancers to create detailed profiles that showcase their skills, experience, and portfolio.
 4. Project listings: Clients should be able to browse and search for project listings that match their needs and budget.
 5. Secure messaging system: The platform should have a messaging system that allows clients and freelancers to communicate and negotiate project details before and during the project's execution.
 6. Secure payment processing: A Fiverr clone platform should offer a secure payment processing system that ensures that all transactions between clients and freelancers are safe and secure.
 7. Ratings and reviews: The platform should allow clients to leave feedback and ratings for the freelancer after the project is completed.
 8. Commission-based revenue model: The platform should operate on a commission-based revenue model, where the platform takes a percentage of each transaction made between the freelancer and client.
 9. Customizable service packages: Freelancers should be able to offer customizable service packages that fit the needs of different clients.
 10. Customized project proposals: Freelancers should be able to create customized project proposals that outline their services and pricing.
 11. Advanced search and filtering: The platform should offer advanced search and filtering options that allow users to find the services they need quickly and easily.
 12. Mobile-friendly: The platform should be mobile-friendly, with a responsive design that adapts to different screen sizes and devices.
-

BASIC FEATURES

Essentials

1. **User Registration and Login:** A Fiverr clone platform should allow users to create a profile, register and log in using their email or social media accounts.
2. **User Profile Management:** Users should be able to manage their profiles by adding personal information, skills, work experience, and uploading their photo.
3. **Search and Browse:** The platform should offer a search and browse function that allows users to find services based on keywords, category, and subcategory.
4. **Project Management:** The platform should allow users to create projects, manage projects, and track project progress.
5. **Order Management:** The platform should allow users to place orders, manage orders, and track order status.
6. **Messaging and Chat System:** The platform should provide a messaging and chat system that allows users to communicate with each other and discuss project details.
7. **Payment Processing:** The platform should offer a secure payment processing system that allows users to make and receive payments.
8. **Commission Management:** The platform should automatically calculate and collect commission fees on each transaction.
9. **Ratings and Reviews:** The platform should allow clients to rate and review the services they receive from freelancers, and freelancers to rate and review clients.
10. **Dispute Resolution:** The platform should have a dispute resolution system in place to handle conflicts between clients and freelancers.
11. **Feedback System:** The platform should allow users to leave feedback for the platform itself, such as suggestions for improvement or reporting issues.
12. **Service Categories and Subcategories:** The platform should offer a range of service categories and subcategories to help users find the services they need.
13. **Customized Service Packages:** Freelancers should be able to create customized service packages that fit the needs of different clients.
14. **Customized Project Proposals:** Freelancers should be able to create customized project proposals that outline their services and pricing.
15. **Language Support:** The platform should support multiple languages to cater to a global audience.
16. **Geolocation Support:** The platform should allow users to search for services and freelancers based on their location.
17. **Integration with Third-Party Services:** The platform should integrate with third-party services such as payment gateways, social media platforms, and email marketing services.

18. Responsive Design: The platform should have a responsive design that adapts to different screen sizes and devices.
19. Security Features: The platform should have security features such as SSL encryption, two-factor authentication, and regular backups.
20. Notification System: The platform should have a notification system that alerts users of new messages, orders, and other updates.
21. User Verification: The platform should verify user identity and qualifications to maintain the quality of services.
22. Social Sharing: The platform should allow users to share services and projects on social media.
23. Referral System: The platform should have a referral system that rewards users for referring new clients or freelancers.
24. Help and Support: The platform should provide comprehensive help and support, including a knowledge base, FAQs, and customer service options.

In summary, a Fiverr clone platform should offer basic features such as user registration and login, user profile management, search and browse functionality, project and order management, messaging and chat system, payment processing, commission management, ratings and reviews, dispute resolution, feedback system, service categories and subcategories, customized service packages and project proposals, language and geolocation support, integration with third-party services, responsive design, security features, notification system, user verification, social sharing, referral system, and help and support.

ADVANCED FEATURES

Out of Box

1. **Video Chat and Collaboration Tools:** A Fiverr clone platform can provide built-in video chat and collaboration tools to allow clients and freelancers to work together seamlessly in real-time.
 2. **Escrow Payment System:** An escrow payment system can offer more security to both clients and freelancers by holding the payment in an escrow account until the project is completed to the satisfaction of both parties.
 3. **Multi-Currency Support:** A Fiverr clone platform can support multiple currencies to cater to a global audience, allowing users to transact in their local currency.
 4. **Project Milestones and Deadlines:** A Fiverr clone platform can allow clients and freelancers to set project milestones and deadlines to ensure that the project is completed on time and to the required quality standards.
 5. **Gamification Elements:** A Fiverr clone platform can incorporate gamification elements such as badges, points, and leaderboards to encourage user engagement and reward high-performing freelancers.
 6. **API Integration:** A Fiverr clone platform can provide API integration, allowing third-party developers to build their applications that integrate with the platform.
 7. **Analytics and Reporting:** A Fiverr clone platform can provide analytics and reporting tools to help clients and freelancers track their performance, identify areas for improvement, and make data-driven decisions.
 8. **Freelancer Management Tools:** A Fiverr clone platform can provide freelancer management tools to help clients manage their freelance teams, including task assignment, team communication, and performance tracking.
-

KEY BENEFITS

Here are some key benefits of a Zillow Clone:

1. *Convenience:*

The platform offers a one-stop solution for a variety of services, allowing customers to access a range of services from a single platform. This saves customers time and effort and makes the overall experience more convenient.

2. *Increased Revenue:*

By offering a variety of services, businesses can increase their revenue streams and tap into new markets. The platform also provides businesses with valuable data and insights that can help them optimize their operations and increase revenue.

3. *Improved Efficiency:*

The platform streamlines operations by automating many tasks and providing real-time data and insights. This helps businesses reduce costs, improve efficiency, and enhance the overall user experience.

4. *Scalability:*

The platform is designed to be scalable, allowing businesses to expand their operations as they grow. With the ability to add new services and features, businesses can adapt to changing customer demands and stay competitive in the market.

5. *Brand Recognition:*

By offering a range of services under a single brand, businesses can build brand recognition and customer loyalty. The platform also provides businesses with tools and features to promote their services and engage with customers, further enhancing brand recognition.

6. *Enhanced Security:*

The platform offers features such as OTP verification and number masking to enhance security and protect user data. This helps build user trust and confidence in the platform, further enhancing the overall user experience.

7. *Cost-effectiveness:*

By sharing resources and infrastructure across multiple services, businesses can reduce costs and increase efficiency. This allows them to offer competitive pricing and attract more customers, further increasing revenue and growth.

TECH STACK

Powerful & Flexible

1. Web – PHP Laravel with MYSQL:

This combination of technologies can be used to build a scalable and robust web application for the Fiverr Clone. PHP provides a powerful backend language, while Laravel provides a responsive front-end design framework. MySQL is used to store and manage data.

2. Android – Flutter:

The Fiverr Clone can be built as an Android application using Flutter. This provides a robust and scalable platform that can deliver fast and responsive performance. Android provides a wide range of features and APIs that can be used to develop advanced features for the platform.

3. IOS – Swift 5:

The Fiverr Clone can also be built as a native iOS application using Swift 5. This provides a powerful and modern platform that can deliver fast and responsive performance. iOS provides a range of features and APIs that can be used to develop advanced features for the platform.

4. Other – Sockets, Node.js, and Firebase:

These technologies can be used to build additional features and functionalities for the Fiverr Clone. Sockets can be used to build real-time chat and messaging features, while Node.js can be used to build scalable and high-performance backend systems. Firebase can be used to provide cloud-based storage and hosting services for the platform.

All the SDK & Codes Versions are updated as the year standards.

PROCESS FLOW

Know the Flow

User process flow

1. **Registration:** The user starts by registering on the Fiverr clone platform by providing their basic information such as name, email address, and password.
 2. **Profile Creation:** Once registered, the user creates their profile by adding their professional information, such as their skills, work experience, portfolio, and other relevant details that showcase their expertise.
 3. **Search for Services:** The user can then search for the services they need by using the search bar or browsing through the different categories and subcategories available on the platform.
 4. **Selection of Service:** Once the user finds a service that matches their requirements, they can click on the service to view more details such as the freelancer's profile, service description, pricing, delivery time, and ratings and reviews from previous clients.
 5. **Placing an Order:** After selecting the service and reviewing the details, the user can place an order by clicking the "Order Now" button. The user can also discuss the project requirements and negotiate the price and delivery time with the freelancer before placing the order.
 6. **Payment:** Once the order is placed, the user can make the payment using the payment gateway integrated into the platform. The platform can support multiple payment methods such as credit/debit card, PayPal, or other online payment systems.
 7. **Project Execution:** After the payment is made, the freelancer begins working on the project and shares regular updates with the user. The user can also communicate with the freelancer and provide feedback during the project execution.
 8. **Delivery and Acceptance:** Once the project is completed, the freelancer delivers the work to the user. The user can then review the work and either accept it or request revisions.
 9. **Feedback and Ratings:** After the project is completed, the user can provide feedback and ratings based on their experience working with the freelancer. The ratings and feedback help other users on the platform to evaluate the freelancer's skills and reputation.
-

Provider process flow

1. **Registration:** The freelancer starts by registering on the Fiverr clone platform by providing their basic information such as name, email address, and password.
 2. **Profile Creation:** Once registered, the freelancer creates their profile by adding their professional information, such as their skills, work experience, portfolio, and other relevant details that showcase their expertise.
 3. **Service Creation:** The freelancer can then create the services they offer by defining the scope of work, pricing, delivery time, and any other details related to the service.
 4. **Publishing the Service:** After creating the service, the freelancer publishes it on the platform by adding relevant tags and categories to make it easier for users to find.
 5. **Receiving Orders:** When a user places an order for a service offered by the freelancer, the freelancer receives a notification and can review the order details.
 6. **Communication:** The freelancer can communicate with the user to discuss the project requirements, negotiate the price, and set expectations for delivery time.
 7. **Project Execution:** After the freelancer and user have agreed on the project requirements, the freelancer begins working on the project and shares regular updates with the user.
 8. **Delivery and Acceptance:** Once the project is completed, the freelancer delivers the work to the user. The user can then review the work and either accept it or request revisions.
 9. **Payment:** After the user accepts the work, the payment for the service is released to the freelancer. The platform deducts its commission and transfers the remaining amount to the freelancer's account.

IOS	User/Provider App

APPS

Purpose & Functions

User App:

The User App is designed for users who are looking to hire freelancers to complete specific projects or tasks. The primary purpose of the User App is to enable users to search for services, select a service provider, communicate with them, and pay for the services. Some of the main functions of the User App include:

User Registration: Users can register on the platform by creating an account and providing their basic information.

Search for Services: Users can browse through the available services and search for the services they need by using the search bar or filtering the services based on categories, subcategories, and other parameters.

Select Service Provider: Users can view the profiles and portfolios of service providers and select the one that best meets their requirements.

Communication: Users can communicate with service providers through chat, video, or voice calls to discuss project requirements, negotiate pricing, and set expectations.

Payment: Users can make payments for the services they avail of through the payment gateway integrated into the platform.

Host App:

The Provider App is designed for freelancers who are looking to offer their services to users on the platform. The primary purpose of the Provider App is to enable freelancers to create and publish their services, receive orders, communicate with users, and deliver the services. Some of the main functions of the Provider App include:

Freelancer Registration: Freelancers can register on the platform by creating an account and providing their basic information.

Create and Publish Services: Freelancers can create and publish their services by defining the scope of work, pricing, delivery time, and any other details related to the service.

Receive Orders: Freelancers receive orders for their services and can review the order details.

Communication: Freelancers can communicate with users through chat, video, or voice calls to discuss project requirements, negotiate pricing, and set expectations.

Deliver Services: Freelancers can deliver the services to users by sharing the work in progress and final deliverables.

TIME LINE

5 to 7 Days is what it all takes

- 1. Website, Admin & Configurations in 2 days: Developing a website, admin panel, and configurations in 2 days is a challenging task, especially if the project requires custom development or involves complex features. The timeline for web development typically depends on factors such as the scope of the project, the number of pages, the design complexity, and the type of content management system used.*
- 2. Android Apps in 2 days: We finish the android apps as per the inclusions in just 2 days time and provide you apk for getting an overview.*
- 3. IOS Apps in 2 days: We finish the ios apps as per the inclusions in just 2 days time and provide you testflight for getting an overview.*
- 4. Play Store and App Store Publishing 1-5 days subject to approval: Publishing apps to the Play Store and App Store typically involves several steps, including registering as a developer, creating an app listing, submitting the app for review, and waiting for approval. The timeline for publishing an app can vary depending on factors such as the complexity of the app, the quality of the app, and the review process of the app stores. Once the app is approved, it can take anywhere from 1-5 days to become available on the app stores.*

In summary, the timelines provided by us for delivering website, admin configurations, Android apps, and iOS apps are very tight and upright as its mostly rebranding and domain specific.

CLIENT CHECKLIST

Requirements

We need

1. **Linux VPS with WHM License:** We require a Linux VPS with a WHM license to deploy the solution. A Virtual Private Server (VPS) is a type of hosting service that provides dedicated resources and greater flexibility than shared hosting. WHM (Web Host Manager) is a control panel that allows the client to manage multiple hosting accounts and configure server settings.
 - a. **Web Logo:** The client needs to provide one web logo for the solution. The logo should be in a high- resolution format and preferably in a vector file format such as .eps or .ai. The logo should also be relevant to the solution and align with the client's brand guidelines.
 - b. **App Icons:** The client needs to provide five app icons for the solution. The icons should be in high- resolution and preferably in a vector file format such as .eps or .ai. The icons should also be relevant to the solution and align with the client's brand guidelines.
2. **Google Dev Console with billing configured & Play Publish:** To publish the Android app on the Google Play Store, the client needs to provide a Google Developer Console account with billing configured. The Developer Console allows developers to manage app listings, publish apps, and track app performance.
3. **IOS Dev Account:** To publish the iOS app on the App Store, the client needs to provide an Apple Developer account. The Apple Developer account allows developers to manage app listings, publish apps, and track app performance.
4. **App Descriptions for Stores Publishing:** The client needs to provide app descriptions for publishing the apps on the app stores. The app descriptions should be concise, informative, and compelling, highlighting the key features and benefits of the solution. The descriptions should also include relevant keywords to improve visibility in search results.

In summary, to deploy the solution, the client needs to provide a Linux VPS with WHM license, one web logo, five app icons, Google Dev Console with billing configured, an IOS Dev account, and app descriptions for publishing the apps on the app stores.

Support Line

Support channels offered by Miracuves:

1. Whatsapp Chat Support:

Whatsapp is a popular messaging app that many people use to communicate with friends and family. Miracuves offers support through Whatsapp chat, which allows customers to quickly and easily ask questions or report issues. This channel is particularly useful for customers who prefer to communicate through messaging and prefer to avoid making phone calls. Whatsapp chat support can also be used for providing step-by-step guidance, sharing images or screenshots to help troubleshoot issues, or to provide quick updates.

2. CRM & Tickets:

Miracuves uses CRM (Customer Relationship Management) software to manage customer interactions and track support requests. When a customer submits a support request through a ticketing system, it is assigned a unique ticket number that helps Miracuves track the issue from start to finish. This allows the company to respond quickly to customer inquiries, prioritize issues based on urgency or importance, and ensure that each request is handled efficiently.

3. Emails:

Email is a traditional communication channel that many companies use to provide customer support. Customers can send an email to Miracuves with their inquiry or issue, and the company will respond via email. Email support is useful for customers who prefer a more detailed explanation of their issue, and who want to keep a written record of their interaction with the company. Email support also allows customers to attach screenshots or other files that can help explain their issue in more detail.

In summary, Miracuves offers a range of support channels to ensure that customers can get the assistance they need in the most convenient way possible. Each channel has its own benefits, and customers can choose the channel that works best for them.

FAQ

Let's clear it all

SPECIFICATION.

Q: What is Fiverr Clone?

A: Fiverr Clone is a ready-made online marketplace platform that allows users to offer and avail freelance services. It is a clone of the popular freelancing platform, Fiverr, and includes similar features and functionalities.

Q: What are some of the key features of Fiverr Clone?

A: Some of the key features of Fiverr Clone include user and provider registration, service listing and browsing, communication tools, order management, payment gateway integration, reviews and ratings, and admin panel management.

Q: Who can use Fiverr Clone?

A: Fiverr Clone can be used by anyone who wants to start an online marketplace platform for freelancers and service providers. It can be used by entrepreneurs, startups, or existing businesses looking to expand their offerings.

Q: Is Fiverr Clone customizable?

A: Yes, Fiverr Clone is customizable and can be tailored to meet the specific needs and requirements of the business. Customization can be done by the development team or by the business owner using the admin panel.

Q: Is Fiverr Clone easy to use?

A: Yes, Fiverr Clone is designed to be user-friendly and easy to navigate. It has an intuitive interface that makes it easy for users and providers to create profiles, post and browse services, and communicate with each other.

Q: Can Fiverr Clone be integrated with third-party services?

A: Yes, Fiverr Clone can be integrated with third-party services such as payment gateways, analytics tools, and social media platforms to enhance the platform's functionality and performance.

Q: Is Fiverr Clone secure?

A: Yes, Fiverr Clone is built with security features such as SSL encryption, two-factor authentication, and secure payment gateway integration to ensure the safety of user data and transactions.

Q: How much does it cost to launch a Fiverr Clone platform?

A: The cost of launching a Fiverr Clone platform depends on various factors such as customization, hosting, and ongoing maintenance. It is recommended to get a quote from a development team to get an accurate estimate.

Q: Can Fiverr Clone be used on mobile devices?

A: Yes, Fiverr Clone is mobile responsive and can be accessed through mobile devices using a web browser or a dedicated mobile app.

THE SUMMARY

Final Notes

In summary, Fiverr Clone is a ready-made online marketplace platform that allows users to offer and avail freelance services. It is a clone of the popular freelancing platform, Fiverr, and includes similar features and functionalities.

Some of the key features of Fiverr Clone include user and provider registration, service listing and browsing, communication tools, order management, payment gateway integration, reviews and ratings, and admin panel management. The platform is customizable, easy to use, and can be integrated with third-party services such as payment gateways and social media platforms.

Fiverr Clone is designed to be user-friendly and mobile responsive, with an intuitive interface that makes it easy for users and providers to create profiles, post and browse services, and communicate with each other. The platform is also built with security features such as SSL encryption and two-factor authentication to ensure the safety of user data and transactions.

The cost of launching a Fiverr Clone platform depends on various factors such as customization, hosting, and ongoing maintenance. It is recommended to get a quote from a development team to get an accurate estimate.

Overall, Fiverr Clone provides an effective solution for entrepreneurs, startups, or existing businesses looking to launch an online marketplace platform for freelancers and service providers.

ADDONS

More Functions

We have pre-made addons for the system which you can buy and we will integrate for you without any downtime and enhance the solution capabilities.

1. **Multi-currency support:** Allows users to pay and receive payments in multiple currencies.
2. **Multi-language support:** Provides support for multiple languages to cater to users from different regions.
3. **Customizable commission rates:** Allows the platform owner to set different commission rates for different services and users.
4. **Customizable service fees:** Allows the platform owner to charge service fees for specific services or transactions.
5. **Affiliate program:** Enables users to earn commissions by referring new users to the platform.
6. **Referral program:** Encourages existing users to refer new users to the platform by offering rewards or discounts.
7. **Email marketing integration:** Integrates with email marketing tools such as MailChimp and Constant Contact to send newsletters and promotional emails.
8. **Advanced search filters:** Enables users to filter services based on specific criteria such as price, delivery time, and ratings.
9. **Video chat integration:** Enables users to communicate with each other through video chat for better collaboration and understanding.
10. **GDPR compliance:** Ensures that the platform is compliant with the General Data Protection Regulation (GDPR) to protect user privacy.
11. **Two-factor authentication:** Adds an extra layer of security to user accounts by requiring a second form of authentication, such as a code sent to a mobile phone or email.

The advanced features mentioned above in document are also addons, please feel free to explore them as well.

NOTE

Integrating Addons takes 3-4 days of time after purchase and the apps versions might need to be updated and published.

HOW TO USE Operate The Solution

We will provide you with complete walkthrough over the shared screen call and explain all features in detail and make a video record of the same.

- **Confirm before you change**
Please confirm with our team before you decide to make any vital changes to the system.
- **Never change configs**
Please avoid changing any configurations or API settings into the system, it's important to keep the integrity of the system.
- **Backups**
Please make backups of the system using internal backups from admin or from cpanel to ensure no data loss.
- **Feel free to ask**
We are your Technology Partners, feel free to ask questions and we would love to help.
- **Rebranding**
We do complete rebranding for your with your logo, app icons and color schemes. If we missed something let us know.

WARNING !

Please don't add or remove files from server or modify fields in database without discussion or any deep knowledge. Tampering the product will lead into termination of Tech Support.

TECH SUPPORT

We offer 60 Days of Tech Support from the date of deployment and we offer it through all our support channels. This is included with the purchase of the solution.

SCOPE OF TECH SUPPORT

For the complimentary 60 Days of tech support, we help you fix any bugs or configure any services which you are unable to do. This doesn't include backups, or customizations or server management. If you need any of those, please talk to us for our Annual Maintenance Packages.

LICENSE

Each solutions comes with one domain license only and we do the free deploy and install for the same. This is non-transferable and we are not responsible for migration of server or domain, unless agreed for extra cost.
