MIRACUVES INSIGHT

MIRACULOUS IT SOLUTIONS.

Miracuves is a privately owned IT Support and IT Services business formed in 2010. Today we're proud to boast about strong team of IT engineers who thrive on rolling up their sleeves and solving your IT problems and meeting your business needs. We are on a mission to exceed your expectations and form a long-term, mutually beneficial relationship with you.

Miracuves is a team of experienced web and mobile developers with the belief to offer a better solution. It all started with passion and it made us stand unique in the business. We altogether are trying to create new successful entrepreneurs all over the world and we have done it so far! With the latest technologies & frequent upgrades in the products, we always satisfy our customers needs.

Our Mission Is To Enhance The Business Growth Of Our Customers. We Tend To Provide High-Quality Products And Services With Customer Satisfaction As Our Top Priority. We Are Focused To Meet The Expectation Of Our Customers At All Times. We Always Guide Our Customers For Success.

We Believe In Teamwork And Support Our Employees With The Latest And Trending Technologies So That Our Team Will Be In The Best Position To Support Our Customers. This Helps Us To Keep Working With Existing Clients And Also Expand To Newer Ones.

Continually visualize collaborative leadership.

THE PROBLEM

Need for a Ico Launchpad Clone Solution

In the evolving landscape of cryptocurrency and blockchain technologies, startups and agencies face significant challenges when aiming to launch Initial Coin Offerings (ICOs), Security Token Offerings (STOs), or Initial Exchange Offerings (IEOs). The complexities involved in managing token sales, fundraising, security, and diverse currency support often pose substantial barriers to entry and operational efficiency.

1. **Token Management Complexity:** Without a centralized platform, managing token amounts, determining soft-cap/hard-cap limits, setting token prices, and allocating bonuses across various stages becomes a cumbersome and error-prone process.
2. **Currency Diversification:** As the cryptocurrency market expands, startups and agencies need to accommodate a wide range of cryptocurrencies and fiat currencies. Handling multiple currencies without a structured system can lead to operational inefficiencies and potential financial discrepancies.
3. **Security Concerns:** Ensuring robust security measures like Two-Factor Authentication (2FA) and secure password management is crucial. However, implementing these security protocols from scratch can be challenging and might expose vulnerabilities if not adequately addressed.
4. **Referral and Incentive Programs:** Establishing effective referral bonus management systems to incentivize user participation and growth requires intricate configurations. Without a streamlined mechanism, startups might struggle to attract and retain investors.
5. **Technical Framework and Customization:** Building a scalable and customizable platform using popular frameworks like Laravel v8.x, jQuery, and Bootstrap v4 demands specialized expertise. Startups might face delays, increased development costs, and limited functionality without access to a ready-to-deploy solution.
6. **Compliance and Verification:** Adhering to Know Your Customer (KYC) and Anti-Money Laundering (AML) regulations is non-negotiable. However, implementing robust KYC/AML systems without a structured framework can lead to legal complications and regulatory hurdles.
7. **Operational Efficiency and Data Management:** Managing transactions, user verifications, payment gateways, and data exports manually or through disparate systems can lead to inefficiencies, data inconsistencies, and increased operational costs.
8. **Licensing and Upgrade Considerations:** Understanding and navigating the complexities of licensing terms, upgrade requirements, and potential repurchase obligations can be daunting, especially for startups with limited resources and expertise.

Solving
Issues.

SOLUTION OVERVIEW

Technology meet Creativity.

The ICO LaunchPad clone emerges as a comprehensive and tailored solution designed explicitly to address the multifaceted challenges faced by startups and agencies in the cryptocurrency ecosystem. By integrating advanced functionalities such as streamlined token management, diversified currency support encompassing major cryptocurrencies and fiat currencies, and robust security protocols including Two-Factor Authentication (2FA), the platform significantly simplifies the intricate process of launching Initial Coin Offerings (ICOs), Security Token Offerings (STOs), or Initial Exchange Offerings (IEOs). Leveraging the power of the Laravel v8.x framework, jQuery, and Bootstrap v4, the solution offers a scalable, customizable, and user-friendly interface that facilitates efficient management of token sales, fundraising initiatives, referral programs, and regulatory compliance requirements like Know Your Customer (KYC) and Anti-Money Laundering (AML) protocols.

Furthermore, the ICO LaunchPad clone provides an integrated ecosystem that enhances operational efficiency, minimizes development complexities, and mitigates security risks, thereby enabling startups and agencies to focus on core business objectives and strategic growth initiatives. With features such as a built-in referral bonus management system, API access for external site integration, multilingual support, and comprehensive documentation, the platform offers a holistic approach to navigating the cryptocurrency landscape. Additionally, by offering a seamless user experience, robust data management capabilities, and continuous support and updates, the ICO LaunchPad clone empowers organizations to establish a strong market presence, foster investor trust, and achieve sustainable success in the competitive and evolving world of blockchain technologies and token sales.

CUSTOMIZEABLE.

In addition, the Ico Launchpad Clone is highly customizable, allowing businesses to tailor the platform to their specific needs and requirements. Whether it's adding new services, integrating with third-party systems, or customizing the user interface, the platform can be easily customized to meet the unique needs of each business.

KEY FEATURES

1. **Token Management:** The ICO LaunchPad clone offers comprehensive tools to manage token sales effectively. Users can set token amounts, establish soft-cap/hard-cap limits, determine token prices, and allocate bonuses across multiple stages, ensuring flexibility and control throughout the fundraising process.
 2. **Currency Support:** Recognizing the diverse nature of the cryptocurrency market, the platform supports major cryptocurrencies such as ETH, BTC, LTC, BCH, and fiat currencies including USD, GBP, EUR, CAD, among others. This extensive currency support facilitates broader participation and investment opportunities for global investors.
 3. **Security Protocols:** Prioritizing user security, the ICO LaunchPad clone incorporates advanced features like Two-Factor Authentication (2FA) for enhanced account protection. Additionally, users can change passwords through email confirmation, ensuring an additional layer of security against unauthorized access and potential breaches.
 4. **Referral Bonus Management:** The platform integrates a built-in referral bonus management system, enabling investors to invite others to join the platform seamlessly. Administrators can specify bonus amounts for both referrers and referees, fostering community growth and engagement through incentivized programs.
 5. **Technical Framework:** Built on the robust Laravel v8.x framework, coupled with jQuery and Bootstrap v4, the ICO LaunchPad clone offers a scalable and customizable solution. Users familiar with PHP/Laravel can easily customize functionalities, add modules, or integrate additional libraries to meet specific business requirements.
 6. **KYC/AML Compliance:** The platform features a comprehensive KYC/AML system to verify user identities, ensuring compliance with regulatory standards and mitigating potential legal risks. Administrators can control KYC fields, set verification requirements, and manage user data securely.
 7. **Payment Gateways:** To facilitate seamless transactions, the ICO LaunchPad clone supports multiple payment gateways, including offline crypto payments, bank transfers, and PayPal. This versatility enables users to choose preferred payment methods, enhancing convenience and accessibility for investors.
 8. **Data Management and Export:** Users can export transaction and user lists in CSV format, enabling efficient data management, analysis, and reporting. Advanced search and filter options further streamline data retrieval, ensuring accuracy and relevance in decision-making processes.
 9. **User Interface and Experience:** Designed with a clean, modern interface and multiple color schemes, the platform offers an intuitive user experience for both administrators and investors. Features like login/register with social accounts, multilingual support, and full white-label branding enhance usability and engagement.
 10. **Continuous Support and Updates:** The ICO LaunchPad clone provides free premium support 24/7, ensuring timely assistance and resolution of queries. Additionally, the platform undergoes regular updates, incorporating new features and bug fixes to maintain optimal performance and security standards.
-

KEY BENEFITS

Here are some key benefits of a Ico Launchpad Clone:

1. **Streamlined Token Launch Process:** The ICO LaunchPad clone simplifies the complex process of initiating ICOs, STOs, or IEOs by offering intuitive tools for token management, enabling startups and agencies to set clear objectives, manage fundraising goals, and execute strategic plans efficiently.
2. **Enhanced Currency Accessibility:** With support for a wide range of cryptocurrencies and fiat currencies, the platform facilitates broader investor participation, fostering global reach and accessibility. This diverse currency integration minimizes barriers to entry and maximizes investment opportunities across different markets.
3. **Robust Security Measures:** By incorporating advanced security protocols like Two-Factor Authentication (2FA) and secure password management, the ICO LaunchPad clone safeguards user accounts and sensitive data against unauthorized access, cyber threats, and potential breaches, instilling confidence and trust among investors.
4. **Incentivized Referral Programs:** The built-in referral bonus management system incentivizes user engagement and growth by rewarding both referrers and referees. This community-driven approach fosters organic growth, enhances platform visibility, and encourages active participation, contributing to a vibrant and sustainable ecosystem.
5. **Customizable and Scalable Framework:** Built on the Laravel v8.x framework and incorporating jQuery and Bootstrap v4, the platform offers a scalable and customizable solution tailored to specific business requirements. This flexibility empowers startups and agencies to adapt, innovate, and evolve in response to market dynamics and emerging trends.
6. **Compliance and Regulatory Adherence:** The comprehensive KYC/AML system ensures adherence to regulatory standards and mitigates legal risks associated with user verification and data management. By facilitating compliance, the ICO LaunchPad clone minimizes regulatory hurdles, fosters transparency, and builds credibility with stakeholders.
7. **Seamless Payment Integration:** Supporting multiple payment gateways, including offline crypto payments, bank transfers, and PayPal, the platform enhances transactional efficiency and convenience for investors. This seamless integration simplifies fundraising efforts, accelerates transaction processing, and improves user satisfaction.
8. **Efficient Data Management and Analytics:** The platform's advanced data management features, including export options, search capabilities, and filter functionalities, enable startups and agencies to analyze trends, monitor performance,

and make informed decisions. This data-driven approach enhances strategic planning, optimizes resource allocation, and drives business growth.

9. **User-Centric Design and Experience:** Designed with a focus on user experience, the ICO LaunchPad clone offers an intuitive interface, multiple color schemes, and seamless navigation, enhancing user engagement and satisfaction. Features like social login, multilingual support, and white-label branding further enhance platform usability, accessibility, and appeal.
10. **Continuous Support and Updates:** With free premium support available 24/7 and regular updates incorporating new features and bug fixes, the ICO LaunchPad clone ensures optimal performance, reliability, and security. This ongoing support and commitment to excellence enable startups and agencies to focus on core business objectives, innovation, and growth.

TECH STACK

Powerful & Flexible

Web - PHP Bootstrap with MYSQL:

This combination of technologies can be used to build a scalable and robust web application for the Ico Launchpad Clone. PHP provides a powerful backend language, while Bootstrap provides a responsive front-end design framework. MySQL can be used to store and manage data.

Android - Native Java:

The Ico Launchpad Clone can be built as a native Android application using Java. This provides a robust and scalable platform that can deliver fast and responsive performance. Android provides a wide range of features and APIs that can be used to develop advanced features for the platform.

iOS - Swift 5:

The Ico Launchpad Clone can also be built as a native iOS application using Swift 5. This provides a powerful and modern platform that can deliver fast and responsive performance. iOS provides a range of features and APIs that can be used to develop advanced features for the platform.

Other - Sockets, Node.js, and Firebase:

These technologies can be used to build additional features and functionalities for the Ico Launchpad Clone. Sockets can be used to build real-time chat and messaging features, while Node.js can be used to build scalable and high-performance backend systems. Firebase can be used to provide cloud-based storage and hosting services for the platform.

All the SDK & Codes Versions are updated as the year standards.

PROCESS FLOW

Know the Flow

1. Initialization and Configuration:

- **Platform Setup:** Upon acquiring the ICO LaunchPad Clone solution, organizations initiate the setup process by configuring essential parameters such as token amounts, soft-cap/hard-cap limits, token prices, and bonus structures.
- **Currency Selection:** Administrators select supported cryptocurrencies and fiat currencies based on project requirements, facilitating diverse payment options for investors.

2. User Registration and Authentication:

- **Account Creation:** Potential investors and contributors register on the platform by providing necessary details and undergoing the registration process.
- **Two-Factor Authentication (2FA):** Users activate 2FA for their accounts, enhancing security measures and safeguarding against unauthorized access.

3. KYC/AML Verification:

- **User Identification:** Registered users submit required documents and information for KYC/AML verification, ensuring compliance with regulatory standards and mitigating legal risks.
- **Verification Process:** Administrators review and verify user submissions, granting access to approved participants and maintaining transparency and credibility within the ecosystem.

4. Token Sale and Fundraising:

- **Token Allocation:** Organizations initiate token sales by allocating tokens according to predefined parameters such as stages, prices, and bonus structures.
- **Payment Processing:** Investors select preferred payment methods, including cryptocurrency transactions, bank transfers, or PayPal payments, facilitating seamless and secure transactions.
- **Transaction Monitoring:** The platform monitors and records transactions, providing real-time insights and analytics on token sales, contributions, and fundraising progress.

5. Referral and Bonus Incentives:

- **Referral Programs:** Investors participate in referral programs by inviting others to join the platform, earning bonuses for successful referrals.
- **Bonus Allocation:** The platform automatically allocates bonuses to referrers and referees based on predefined criteria, fostering community growth and engagement.

6. Data Management and Analysis:

- **Data Export:** Administrators utilize data export functionalities to retrieve transaction and user lists in CSV format, facilitating comprehensive analysis and reporting.
- **Analytics and Insights:** Organizations leverage platform analytics to monitor performance metrics, evaluate campaign effectiveness, and make informed decisions based on real-time data and trends.

7. Security and Compliance:

- **Security Protocols:** Users and administrators adhere to established security protocols, including 2FA authentication, secure password management, and encrypted data storage, ensuring robust protection against cyber threats and vulnerabilities.
- **Regulatory Adherence:** Organizations maintain compliance with KYC/AML regulations, implement necessary security measures, and adhere to jurisdictional requirements, mitigating legal risks and fostering trust among stakeholders.

8. Platform Customization and Maintenance:

- **Customization Options:** Organizations customize the platform according to specific branding guidelines, user preferences, and functional requirements, ensuring a tailored and seamless user experience.
 - **Ongoing Support and Updates:** Administrators receive continuous support, updates, and maintenance services from providers, ensuring optimal performance, security, and functionality throughout the platform lifecycle.
-

INCLUSIONS

Know All You get

1. Token Management System:

- Comprehensive tools for managing token sales, including allocation, pricing, bonus structures, and fundraising goals.

2. Currency Support:

- Integration with major cryptocurrencies such as ETH, BTC, LTC, BCH, BNB, TRX, XLM, XRP, USDT, USDC, DASH, and multiple fiat currencies like USD, GBP, EUR, CAD, among others.

3. Security Features:

- Two-Factor Authentication (2FA) for enhanced user account security.
- Secure password management through email confirmation.

4. KYC/AML Compliance:

- Built-in KYC/AML verification system to facilitate user identification and regulatory adherence.

5. Payment Gateways:

- Support for multiple payment methods including offline crypto payments, bank transfers, and PayPal.

6. Referral Bonus Management System:

- Built-in referral program to incentivize user referrals and foster community growth.

7. User Interface and Experience:

- Clean, modern, and responsive UI design with multiple color schemes and layout options.
- Multilingual support for catering to global audiences.

8. Data Management and Export:

- Data export functionalities to retrieve transaction and user lists in CSV format.
- Advanced search and filter options for efficient data analysis and reporting.

9. Technical Framework:

- Built on Laravel v8.x framework, jQuery, and Bootstrap v4 for robustness, scalability, and customization capabilities.

10.API Access:

- Access to API for integration and data retrieval from external sites or applications.

11.White-label Branding:

- Full white-label branding capabilities for customizing the platform according to specific branding guidelines and requirements.
-

APPS

Purpose & Functions

1. Token Sale Management:

- Facilitate the creation, allocation, pricing, and management of tokens for ICOs, STOs, or IEOs.
- Define token distribution stages, soft-cap/hard-cap limits, and bonus structures.

2. Currency Integration:

- Support for major cryptocurrencies (e.g., ETH, BTC, LTC) and fiat currencies (e.g., USD, GBP, EUR).
- Enable seamless transactions and investment opportunities across diverse currency platforms.

3. User Authentication and Security:

- Implement Two-Factor Authentication (2FA) for enhanced account security.
- Enable secure password management and email confirmation for password changes.

4. KYC/AML Verification System:

- Integrate KYC/AML verification processes for user identification and regulatory compliance.
- Allow administrators to review, approve, or reject user submissions based on predefined criteria.

5. Payment Gateway Integration:

- Support multiple payment methods, including offline crypto payments, bank transfers, and PayPal.
- Enable secure and efficient transaction processing for contributors and investors.

6. Referral Bonus Management:

- Implement a referral bonus program to incentivize user referrals and foster community growth.
- Define and allocate bonuses to referrers and referees based on predetermined conditions.

7. Data Management and Reporting:

- Provide tools for data export, allowing administrators to retrieve transaction and user lists in CSV format.
- Offer advanced search, filter, and analytics capabilities for efficient data management and reporting.

8. User Interface and Experience:

- Develop a user-friendly interface with clean, modern design elements, multiple color schemes, and responsive layouts.
- Support multilingual capabilities to cater to global audiences and enhance accessibility.

9. Technical Framework and Customization:

- Leverage Laravel v8.x framework, jQuery, and Bootstrap v4 for robustness, scalability, and customization capabilities.
- Enable white-label branding and customization options to align with specific branding guidelines and requirements.

10. API Access and Integration:

- Provide API access for seamless integration with external sites, applications, or platforms.
 - Facilitate data retrieval, synchronization, and interoperability across different systems or environments.
-

TIME LINE

5 to 7 Days is what it all takes

Website, Admin & Configurations in 2 days: Developing a website, admin panel, and configurations in 2 days is a challenging task, especially if the project requires custom development or involves complex features. The timeline for web development typically depends on factors such as the scope of the project, the number of pages, the design complexity, and the type of content management system used.

Android Apps in 2 days: We finish the android apps as per the inclusions in just 2 days time and provide you apk for getting an overview.

iOS Apps in 2 days: We finish the ios apps as per the inclusions in just 2 days time and provide you testflight for getting an overview.

Play Store and App Store Publishing 1-5 days subject to approval: Publishing apps to the Play Store and App Store typically involves several steps, including registering as a developer, creating an app listing, submitting the app for review, and waiting for approval. The timeline for publishing an app can vary depending on factors such as the complexity of the app, the quality of the app, and the review process of the app stores. Once the app is approved, it can take anywhere from 1-5 days to become available on the app stores.

In summary, the timelines provided by us for delivering website, admin configurations, Android apps, and iOS apps are very tight and upright as its mostly rebranding and domain specific.

CLIENT CHECKLIST

Requirements

We need

Linux VPS with WHM License: We require a Linux VPS with a WHM license to deploy the solution. A Virtual Private Server (VPS) is a type of hosting service that provides dedicated resources and greater flexibility than shared hosting. WHM (Web Host Manager) is a control panel that allows the client to manage multiple hosting accounts and configure server settings.

1 Web Logo: The client needs to provide one web logo for the solution. The logo should be in a high-resolution format and preferably in a vector file format such as .eps or .ai. The logo should also be relevant to the solution and align with the client's brand guidelines.

1 App Icon: The client needs to provide one app icon for the solution. The icons should be in high-resolution and preferably in a vector file format such as .eps or .ai. The icons should also be relevant to the solution and align with the client's brand guidelines.

Google Dev Console with billing configured & Play Publish: To publish the Android app on the Google Play Store, the client needs to provide a Google Developer Console account with billing configured. The Developer Console allows developers to manage app listings, publish apps, and track app performance.

IOS Dev Account: To publish the iOS app on the App Store, the client needs to provide an Apple Developer account. The Apple Developer account allows developers to manage app listings, publish apps, and track app performance.

App Descriptions for Stores Publishing: The client needs to provide app descriptions for publishing the apps on the app stores. The app descriptions should be concise, informative, and compelling, highlighting the key features and benefits of the solution. The descriptions should also include relevant keywords to improve visibility in search results.

In summary, to deploy the solution, the client needs to provide a Linux VPS with WHM license, one web logo, one app icons, Google Dev Console with billing configured, an IOS Dev account, and app descriptions for publishing the apps on the app stores.

Support Line

Support channels offered by Miracuves:

1. Whatsapp Chat Support:

Whatsapp is a popular messaging app that many people use to communicate with friends and family. Miracuves offers support through Whatsapp chat, which allows customers to quickly and easily ask questions or report issues. This channel is particularly useful for customers who prefer to communicate through messaging and prefer to avoid making phone calls. Whatsapp chat support can also be used for providing step-by-step guidance, sharing images or screenshots to help troubleshoot issues, or to provide quick updates.

2. CRM & Tickets:

Miracuves uses CRM (Customer Relationship Management) software to manage customer interactions and track support requests. When a customer submits a support request through a ticketing system, it is assigned a unique ticket number that helps Miracuves track the issue from start to finish. This allows the company to respond quickly to customer inquiries, prioritize issues based on urgency or importance, and ensure that each request is handled efficiently.

3. Emails:

Email is a traditional communication channel that many companies use to provide customer support. Customers can send an email to Miracuves with their inquiry or issue, and the company will respond via email. Email support is useful for customers who prefer a more detailed explanation of their issue, and who want to keep a written record of their interaction with the company. Email support also allows customers to attach screenshots or other files that can help explain their issue in more detail.

In summary, Miracuves offers a range of support channels to ensure that customers can get the assistance they need in the most convenient way possible. Each channel has its own benefits, and customers can choose the channel that works best for them.

FAQ

Let's clear it all

SPECIFICATION.

What is ICO LaunchPad Clone?

ICO LaunchPad Clone is a comprehensive solution designed to assist cryptocurrency startups and agencies in launching Initial Coin Offerings (ICOs), Security Token Offerings (STOs), or Initial Exchange Offerings (IEOs). It offers functionalities like token management, currency support, security features, and user engagement tools.

Which cryptocurrencies and fiat currencies does ICO LaunchPad Clone support?

The platform supports major cryptocurrencies such as ETH, BTC, LTC, BCH, BNB, TRX, XLM, XRP, USDT, USDC, DASH, among others. Additionally, it accommodates fiat currencies like USD, GBP, EUR, CAD, AUD, TRY, NGN, INR, RUB, and more.

How does the KYC/AML verification process work?

ICO LaunchPad Clone integrates a built-in KYC/AML verification system. Users submit necessary documents and information for verification, which administrators review to ensure compliance with regulatory standards and legal requirements.

Is Two-Factor Authentication (2FA) supported on the platform?

Yes, the platform incorporates Two-Factor Authentication (2FA) for enhanced security. Users can enable 2FA to add an extra layer of protection to their accounts, ensuring secure access and safeguarding against unauthorized activities.

Can I customize the platform according to my branding guidelines?

Absolutely, ICO LaunchPad Clone offers white-label branding capabilities and customization options. Organizations can tailor the platform's design, layout, and functionalities to align with specific branding guidelines, user preferences, and functional requirements.

What payment methods are supported for token purchases?

The platform supports multiple payment methods, including offline crypto payments, bank transfers, and PayPal. This facilitates seamless and secure transactions for contributors and investors across various platforms and regions.

Is there documentation and support available for platform setup and usage?

Yes, ICO LaunchPad Clone provides comprehensive documentation, manual instruction files, and user guides to assist with platform setup, configuration, and usage. Additionally, free premium 24/7 support is available to address queries, issues, and ensure optimal platform performance.

How does the referral bonus program work?

The platform features a built-in referral bonus management system. Users can participate in referral programs by inviting others to join the platform, earning bonuses for successful referrals. Administrators can define and allocate bonuses based on predetermined conditions to foster community growth and engagement.

Is API access available for integrating external sites or applications?

Yes, ICO LaunchPad Clone offers API access to facilitate seamless integration with external sites, applications, or platforms. This enables data retrieval, synchronization, and interoperability across different systems or environments, enhancing functionality and scalability.

THE SUMMARY

Final Notes

ICO LaunchPad Clone emerges as a comprehensive and robust solution meticulously designed to empower cryptocurrency startups and agencies in navigating the complexities of the token sales landscape. Integrating advanced functionalities, security protocols, and user-centric features, the platform facilitates seamless initiation and management of Initial Coin Offerings (ICOs), Security Token Offerings (STOs), or Initial Exchange Offerings (IEOs). With support for major cryptocurrencies, fiat currencies, and diverse payment methods, ICO LaunchPad Clone fosters global accessibility and inclusivity, enabling organizations to engage a broader audience of investors and contributors. Furthermore, the platform prioritizes security and compliance through built-in KYC/AML verification systems, Two-Factor Authentication (2FA), and regulatory adherence, ensuring trust, transparency, and legal conformity within the ecosystem.

Leveraging the power of Laravel v8.x framework, jQuery, and Bootstrap v4, ICO LaunchPad Clone offers a scalable, customizable, and user-friendly interface tailored to specific business requirements and branding guidelines. Whether it's token management, referral bonus programs, data analytics, or multilingual support, the platform encompasses a myriad of app functions designed to streamline operations, enhance user engagement, and drive organizational success. Moreover, with comprehensive documentation, free premium 24/7 support, and white-label branding capabilities, ICO LaunchPad Clone empowers organizations to establish a strong market presence, foster investor trust, and achieve sustainable growth in the competitive and dynamic landscape of blockchain technologies and token sales.

**Thanks for your interest in
our solution.**

Hope to work with your soon.

GLOSSARY

ICO	KYC
STO	AML
IEO	Payment gateway
Token	Referral bonus
Cryptocurrency	User verification
Blockchain	Laravel v8.x
Initial Coin Offering	jQuery
Security Token Offering	Bootstrap v4
Initial Exchange Offering	API access
Soft-cap	Multilingual support
Hard-cap	Data management
Token price	White-label branding
Bonus structure	Admin panel
Currency support	User dashboard
Two-Factor Authentication (2FA)	Security protocols

HOW TO USE Operate The Solution

We will provide you with complete walkthrough over the shared screen call and explain all features in detail and make a video record of the same.

- **Confirm before you change**
Please confirm with our team before you decide to make any vital changes to the system.
- **Never change configs**
Please avoid changing any configurations or API settings into the system, it's important to keep the integrity of the system.
- **Backups**
Please make backups of the system using internal backups from admin or from cpanel to ensure no data loss.
- **Feel free to ask**
We are your Technology Partners, feel free to ask questions and we would love to help.
- **Rebranding**
We do complete rebranding for your with your logo, app icons and color schemes. If we missed something let us know.

WARNING !

Please don't add or remove files from server or modify fields in database without discussion or any deep knowledge. Tampering the product will lead into termination of Tech Support.

TECH SUPPORT

We offer 60 Days of Tech Support from the date of deployment and we offer it through all our support channels. This is included with the purchase of the solution.

SCOPE OF TECH SUPPORT

For the complimentary 60 Days of tech support, we help you fix any bugs or configure any services which you are unable to do. This doesn't include backups, or customizations or server management. If you need any of those, please talk to us for our Annual Maintenance Packages.

LICENSE

Each solutions comes with one domain license only and we do the free deploy and install for the same. This is non-transferable and we are not responsible for migration of server or domain, unless agreed for extra cost.
