MIRACUVES
INSIGHT

MIRACULOUS IT SOLUTIONS.

Miracuves is a privately owned IT Support and IT Services business formed in 2010. Today we're proud to boast about strong team of IT engineers who thrive on rolling up their sleeves and solving your IT problems and meeting your business needs. We are on a mission to exceed your expectations and form a long-term, mutually beneficial relationship with you.

Miracuves is a team of experienced web and mobile developers with the belief to offer a better solution. It all started with passion and it made us stand unique in the business. We altogether are trying to create new successful entrepreneurs all over the world and we have done it so far! With the latest technologies & frequent upgrades in the products, we always satisfy our customers needs.

Our Mission Is To Enhance The Business Growth Of Our Customers. We Tend To Provide High-Quality Products And Services With Customer Satisfaction As Our Top Priority. We Are Focused To Meet The Expectation Of Our Customers At All Times. We Always Guide Our Customers For Success.

We Believe In Teamwork And Support Our Employees With The Latest And Trending Technologies So That Our Team Will Be In The Best Position To Support Our Customers. This Helps Us To Keep Working With Existing Clients And Also Expand To Newer Ones.

Continually visualize collaborative leadership.

THE PROBLEM

Need for a LinkedIn Clone Solution

Current Professional Networking Limitations:

- Existing professional networking platforms might not offer customization or might be restricted in terms of features. Developers or businesses seeking flexibility and specific functionalities tailored to their needs might find current solutions limiting.

Need for a Customizable Solution:

- As businesses and developers evolve, there's a growing demand for platforms that can be customized easily. The rigidity of existing platforms might not cater to unique requirements or desired feature integrations.

Continuous Improvement and Innovation:

- The existing professional networking platforms might not be agile in terms of incorporating new features or adapting to changing market demands. A stagnating platform can result in missed opportunities and user dissatisfaction.

Lack of Comprehensive Solutions:

- While there might be individual solutions available for specific functionalities (like user management, content creation, job postings), there's a need for a holistic platform that integrates all these features seamlessly, reducing the complexity of managing multiple tools or platforms.

Desire for Control and Ownership:

- Organizations and developers might seek full control over their networking platform, including its backend, user experience, and data management. Existing platforms might not provide this level of ownership or might come with limitations that hinder growth and innovation.

Monetization and Revenue Opportunities:

- Existing platforms might not offer flexible monetization options, such as premium memberships, advertisements, or other revenue-generating features. This limits the potential for businesses to generate income from their networking platform.

Solving
Issues.

SOLUTION OVERVIEW
Technology meet Creativity.

The LinkedIn Clone emerges as a robust solution designed to address the limitations and rigidities observed in existing professional networking platforms. Crafted with flexibility and customization at its core, this clone offers developers and businesses an adaptable framework, allowing for tailored feature integrations and specific functionalities to meet unique requirements. By prioritizing continuous improvement, the platform ensures agility in adapting to evolving market demands and user preferences, ensuring that stakeholders are equipped with a solution that remains relevant and innovative.

At its foundation, the LinkedIn Clone provides a comprehensive suite of tools encapsulated within a user-friendly interface. Offering a seamless experience across mobile platforms, it encompasses essential features such as user management, content creation, job postings, and networking capabilities. Beyond its core functionalities, the solution is underpinned by an extensive support ecosystem, including detailed documentation, API collections, and an admin panel for streamlined management. This holistic approach not only facilitates efficient platform operation but also empowers organizations and developers with full control, ownership, and monetization opportunities, positioning the LinkedIn Clone as a versatile and scalable solution in the realm of professional networking.

CUSTOMIZEABLE.

In addition, the LinkedIn Clone is highly customizable, allowing businesses to tailor the platform to their specific needs and requirements. Whether it's adding new services, integrating with third-party systems, or customizing the user interface, the platform can be easily customized to meet the unique needs of each business.

KEY FEATURES

Core Features:

1. **User Authentication & Management**:
   - **Login**: Secure login functionality for users.
   - **Register**: User registration process to onboard new members.
   - **Verify Register**: Verification mechanism to authenticate new registrations.
   - **Request Register Verification**: System to request and verify user registration.
2. **Profile Management**:
   - **Get Profile**: Access to user profiles for viewing and updating.
   - **Update Profile**: Capability for users to modify their profile details.
   - **Update Profile Picture**: Option for users to change their profile photos.
   - **Delete Profile Picture**: Functionality to remove profile images.
3. **Networking & Connections**:
   - **See Another User Profile**: Ability to view profiles of other users.
   - **Send, Withdraw, Accept, Reject Network Invitation**: Features to manage networking invitations and connections.
4. **Content Creation & Interaction**:
   - **Create Content**: Users can create and post content.
   - **Like Content**: Option to like or react to posted content.
   - **Create Comment**: Functionality to comment on posts.
   - **Feed**: A feed system to view posts and updates from connections.
5. **Professional Experience**:
   - **Update Working Experience**: Users can modify their professional experience details.
   - **Create Working Experience**: Option to add new professional experiences.
   - **See Working Experiences**: View detailed work history and experiences.
6. **Organization & Job Management**:
   - **Create & Manage Organization**: Tools for users to establish and oversee organizations.
   - **Create & Manage Job Information at Organization**: Features to post and manage job listings within organizations.
   - **Apply to Job & Manage Job Applicants**: Capability for users to apply for jobs and manage applications.

7. **Communication & Notifications**:
   - ○ **Sending & Receiving Chats**: Messaging functionality for networking connections.
   - ○ **Push Notification**: System to notify users about updates, messages, and other relevant activities.

Additional Features:

8. **Admin Panel Integration**:
   - ○ **Manage User Registration & Applications**: Control panel functionalities for overseeing user registrations and applications.
   - ○ **Manage Metadata**: Tools to handle and modify metadata, providing context or additional information to users or content.

KEY BENEFITS

Here are some key benefits of a LinkedIn Clone:

Enhanced Professional Networking:

1. **Tailored Experience**: Users can enjoy a customized networking platform tailored to specific needs and preferences, ensuring a more relevant and engaging experience compared to generic solutions.
2. **Comprehensive Features**: The inclusion of core functionalities such as profile management, content creation, and job postings creates a holistic environment for professional interactions, fostering meaningful connections and collaborations.

Flexibility and Scalability:

3. **Customization Capabilities**: Developers and businesses have the flexibility to customize and extend the platform, ensuring alignment with evolving requirements and market demands.
4. **Scalable Infrastructure**: The underlying architecture and design facilitate seamless scalability, allowing the platform to grow and adapt as user bases expand and new features are introduced.

Efficient Management and Control:

5. **Streamlined Operations**: The integrated admin panel empowers administrators with tools to manage user registrations, applications, and metadata efficiently, enhancing operational efficiency and control.
6. **Monetization Opportunities**: Organizations can explore diverse monetization avenues, including premium memberships and advertisements, leveraging the platform's capabilities to generate revenue and sustain growth.

User-Centric Experience:

7. **Engaging Interactions**: Features such as content creation, likes, comments, and networking invitations promote engaging interactions among users, fostering a vibrant and collaborative community.
8. **Accessible Platforms**: With support for both iOS and Android, users can access the platform seamlessly across multiple devices, ensuring accessibility and convenience.

Continuous Improvement and Support:

9. **Ongoing Development**: The commitment to continuous improvement ensures that the platform remains updated with new features and enhancements, aligning with emerging trends and user feedback.
10. **Comprehensive Support**: Users benefit from comprehensive documentation, API collections, and support channels, ensuring a smooth onboarding process and addressing queries or issues promptly.

TECH STACK
Powerful & Flexible

1. **Platform & Framework**:
   - o **Mobile Application**: Developed using Flutter for cross-platform compatibility, ensuring seamless performance on both iOS and Android devices.
   - o **Backend API**: Built using a scalable backend framework (possibly Node.js, Django, Flask, or similar) to support the application's core functionalities and handle data processing.
2. **Database**:
   - o **Database Management System**: A relational database management system (e.g., MySQL, PostgreSQL) to store user profiles, content, job information, networking connections, and other relevant data.
   - o **Database Scripts**: Provided scripts to define database schema, relationships, and operations, ensuring consistent data storage and retrieval.
3. **Authentication & Security**:
   - o **User Authentication**: Implemented using secure protocols (e.g., OAuth, JWT) to authenticate users during login and registration processes.
   - o **Data Encryption**: Utilization of encryption techniques (e.g., SSL/TLS) to secure data transmission and storage, ensuring user privacy and protection against unauthorized access.
4. **API Integration**:
   - o **RESTful API**: The backend exposes RESTful APIs, facilitating seamless communication between the mobile application, admin panel, and database.
   - o **Postman API Collection**: Provided Postman collections for testing and integration, ensuring API functionalities align with specified requirements.
5. **Admin Panel**:
   - o **Web-Based Interface**: Developed using responsive web design principles, ensuring accessibility and functionality across various devices and screen sizes.

    o **Dashboard & Management Tools**: Features comprehensive dashboard and management tools to oversee user registrations, applications, content management, and metadata control.

6. **Notifications & Communication**:
    o **Push Notification Service**: Integrated push notification services (e.g., Firebase Cloud Messaging, Apple Push Notification Service) to deliver real-time updates and alerts to users.
    o **Chat Functionality**: Implemented using WebSocket or similar technologies to facilitate real-time messaging and communication between networking connections.

7. **Scalability & Performance**:
    o **Cloud Infrastructure**: Deployed on scalable cloud platforms (e.g., AWS, Google Cloud, Azure) to accommodate growing user bases, ensuring optimal performance, and availability.
    o **Load Balancing & Caching**: Utilization of load balancing techniques and caching mechanisms (e.g., Redis) to distribute traffic efficiently and enhance application responsiveness.

All the SDK & Codes Versions are updated as the year standards.

PROCESS FLOW
Know the Flow

User Process Flow:

1. **Registration & Authentication**:
   - Users initiate the process by registering on the platform using their email address and creating a password.
   - Upon registration, users receive a verification link or code to authenticate their account.
   - Post-verification, users can log in using their credentials or through social authentication methods.
2. **Profile Management**:
   - After logging in, users can navigate to their profile section to view and edit personal details, professional experiences, and profile pictures.
   - Users have the option to update their working experiences, add new professional roles, and manage associated organizations.
3. **Networking & Connections**:
   - Users can search for other users by name, profession, or organization.
   - Upon finding relevant connections, users can send networking invitations, accept or reject received invitations, and manage their connections' list.
   - Users receive notifications for new connection requests, accepted invitations, and other networking activities.
4. **Content Creation & Interaction**:
   - Users can create and publish content, such as posts, articles, or updates, on their feed or profile.
   - Other users can like, comment, or share the content, fostering engagement and interaction within the community.
   - Users receive notifications for likes, comments, and shares on their content, facilitating real-time engagement and feedback.
5. **Job & Organization Interactions**:
   - Users can explore job listings posted by organizations, view job details, and apply for relevant positions.

- o Organizations manage job applications, review applicant profiles, and communicate with potential candidates through integrated messaging functionalities.

6. **Communication & Notifications**:
   - o Users can initiate conversations with connections using the platform's messaging system.
   - o Users receive push notifications for new messages, connection requests, job updates, and other relevant activities, ensuring timely communication and engagement.

Admin Process Flow:

1. **User Management**:
   - o Administrators oversee user registrations, verify new accounts, and manage user profiles and permissions.
   - o Admins monitor user activities, handle reported content or violations, and ensure platform integrity and security.

2. **Content & Metadata Management**:
   - o Administrators manage platform content, review posts, articles, or updates for compliance with guidelines and policies.
   - o Admins oversee metadata management, ensuring consistent and accurate data representation across the platform.

3. **Job & Organization Oversight**:
   - o Admins manage organizations' profiles, verify organizational details, and oversee job listings' authenticity and relevance.
   - o Administrators handle job applications, monitor applicant interactions, and facilitate communication between organizations and candidates.

4. **Platform Monitoring & Maintenance**:
   - o Administrators monitor platform performance, address technical issues or disruptions, and ensure optimal user experience.
   - o Admins implement platform updates, enhancements, and new feature integrations, ensuring continuous improvement and innovation.

INCLUSIONS
Know All You get

Core Inclusions:

1. **Flutter Mobile Application Source Code**:
    o   Complete source code for a cross-platform mobile application compatible with both iOS and Android devices, developed using the Flutter framework.
2. **Backend API Source Code**:
    o   The source code for the backend API that powers the platform's functionalities, ensuring seamless communication between the frontend application, database, and other integrated components.
3. **Admin Panel Source Code**:
    o   Source code for an administrative panel interface, facilitating centralized management, oversight, and control of various platform aspects, including user management, content moderation, and organizational oversight.
4. **Postman API Collection**:
    o   A comprehensive collection of API endpoints documented using Postman, enabling developers to test, integrate, and interact with platform functionalities programmatically.
5. **Database Scripts**:
    o   Scripts and configurations defining the database schema, relationships, constraints, and operations, ensuring consistent data storage, retrieval, and management across the platform.
6. **Documentation**:
    o   Detailed documentation encompassing installation guides, setup instructions, API references, code structure, and best practices, facilitating seamless development, customization, and maintenance processes.
7. **GitHub Repository Access (Extended License)**:
    o   Access to the GitHub repository containing the platform's source code, documentation, and future feature enhancements under an extended license agreement, ensuring transparency, collaboration, and continuous improvement opportunities.

Additional Inclusions (Based on Features):

1. **User Management Tools**:
    - Features and functionalities enabling users to register, authenticate, manage profiles, connect with professionals, create content, explore job opportunities, and engage within the platform's community.
2. **Networking & Collaboration Features**:
    - Tools and functionalities supporting networking activities, professional interactions, content sharing, collaboration opportunities, and engagement mechanisms to foster a vibrant and supportive community environment.
3. **Job & Organization Management Components**:

    - Integrated tools and functionalities facilitating organizations' presence, job postings, candidate applications, organizational interactions, and community engagement within the platform.

4. **Communication & Notification Systems**:

    - Built-in systems supporting real-time messaging, notifications, alerts, and communication channels ensuring seamless interactions, updates, and engagement among platform users and stakeholders.

APPS
Purpose & Functions

User App Functions:

1. **Authentication & Onboarding**:
   - **Login**: Users can securely log in to their accounts using credentials or social authentication methods.
   - **Registration**: New users can create accounts by providing necessary details, such as email, password, and verification information.
   - **Profile Creation**: Users can set up and personalize their profiles by adding professional information, profile pictures, and other relevant details.
2. **Profile Management & Networking**:
   - **Profile Editing**: Users can update, modify, or enhance their profiles, including professional experiences, skills, and endorsements.
   - **Networking**: Users can search, connect, and communicate with other professionals, send/receive networking invitations, and manage connection requests.
3. **Content Creation & Interaction**:
   - **Post Creation**: Users can create, publish, and share professional content, articles, updates, or insights within their network.
   - **Engagement**: Users can like, comment, share, or interact with content posted by connections, fostering engagement and collaboration within the community.
4. **Job & Organization Exploration**:
   - **Job Search**: Users can explore job listings, search for opportunities, and apply for relevant positions within organizations.
   - **Organization Interaction**: Users can discover, follow, and engage with organizations, exploring their profiles, job postings, and professional insights.
5. **Messaging & Notifications**:
   - **Messaging**: Users can initiate, receive, and manage conversations with connections, facilitating professional communication and collaboration.
   - **Notifications**: Users receive real-time notifications for connection requests, messages, content interactions, job updates, and other relevant activities within the platform.

Admin App Functions:

1. **User & Content Management**:
   - o **User Oversight**: Administrators can monitor, verify, manage, and moderate user registrations, profiles, activities, and interactions within the platform.
   - o **Content Moderation**: Admins oversee and manage content posted within the platform, ensuring compliance with guidelines, policies, and community standards.

2. **Organization & Job Oversight**:
   - o **Organization Management**: Administrators verify, manage, and oversee organizational profiles, activities, job postings, and interactions within the platform.
   - o **Job Application Management**: Admins handle, review, and manage job applications, interactions, and communications between organizations and candidates.

3. **Platform Monitoring & Support**:
   - o **Performance Monitoring**: Administrators monitor platform performance, address technical issues, disruptions, and ensure optimal user experience.
   - o **User Support**: Admins provide support, guidance, and assistance to users, addressing queries, issues, and facilitating platform-related inquiries.

Support
Line

Support channels offered by Miracuves:

1. **Whatsapp Chat Support:**
   Whatsapp is a popular messaging app that many people use to communicate with friends and family. Miracuves offers support through Whatsapp chat, which allows customers to quickly and easily ask questions or report issues. This channel is particularly useful for customers who prefer to communicate through messaging and prefer to avoid making phone calls. Whatsapp chat support can also be used for providing step-by-step guidance, sharing images or screenshots to help troubleshoot issues, or to provide quick updates.

2. **CRM & Tickets:**
   Miracuves uses CRM (Customer Relationship Management) software to manage customer interactions and track support requests. When a customer submits a support request through a ticketing system, it is assigned a unique ticket number that helps Miracuves track the issue from start to finish. This allows the company to respond quickly to customer inquiries, prioritize issues based on urgency or importance, and ensure that each request is handled efficiently.

3. **Emails:**
   Email is a traditional communication channel that many companies use to provide customer support. Customers can send an email to Miracuves with their inquiry or issue, and the company will respond via email. Email support is useful for customers who prefer a more detailed explanation of their issue, and who want to keep a written record of their interaction with the company. Email support also allows customers to attach screenshots or other files that can help explain their issue in more detail.

In summary, Miracuves offers a range of support channels to ensure that customers can get the assistance they need in the most convenient way possible. Each channel has its own benefits, and customers can choose the channel that works best for them.

FAQ
Let's clear it all

SPECIFICATION.

What is the LinkedIn Clone?

The LinkedIn Clone is a professional networking platform inspired by LinkedIn, designed to facilitate connections, collaboration, and communication among professionals and organizations.

Is the LinkedIn Clone customizable?

Yes, the LinkedIn Clone is developed with customization in mind, allowing developers and businesses to tailor features, functionalities, and design elements according to specific requirements and preferences.

Which platforms does the LinkedIn Clone support?

The LinkedIn Clone supports both iOS and Android platforms, ensuring compatibility and accessibility across a wide range of mobile devices.

What features does the LinkedIn Clone offer?

The LinkedIn Clone offers a comprehensive suite of features, including user authentication, profile management, networking tools, content creation, job exploration, organizational interactions, messaging, notifications, and administrative oversight.

Can users create and manage organizational profiles?

Yes, users can create, manage, and interact with organizational profiles, explore job postings, and engage with organizations within the platform.

Does the LinkedIn Clone support real-time messaging?

Yes, the LinkedIn Clone integrates real-time messaging functionalities, enabling users to initiate, receive, and manage professional conversations and collaborations within their network.

What technical specifications does the LinkedIn Clone require?

The LinkedIn Clone leverages technologies such as Flutter for mobile application development, backend frameworks for API integration, relational database management systems, and cloud infrastructure for scalability, performance, and security.

THE SUMMARY

Final Notes

The LinkedIn Clone emerges as a dynamic and customizable professional networking platform inspired by the renowned LinkedIn framework. Developed with a focus on flexibility and scalability, this platform offers users a comprehensive suite of features, including authentication, profile management, networking capabilities, content creation, organizational interactions, and real-time messaging. Built upon robust technologies like Flutter for cross-platform compatibility, integrated with scalable backend frameworks, and supported by comprehensive documentation, the LinkedIn Clone empowers developers, businesses, and professionals to foster connections, collaboration, and communication within a tailored and innovative ecosystem.

Furthermore, the LinkedIn Clone transcends traditional networking paradigms by facilitating user-centric experiences, administrative oversight, and community engagement opportunities. With a commitment to customization, continuous improvement, and user satisfaction, the platform offers stakeholders access to source code repositories, licensing options, support channels, and collaboration avenues. By leveraging advanced technologies, fostering community collaboration, and emphasizing user empowerment, the LinkedIn Clone positions itself as a versatile, scalable, and value-driven solution within the professional networking landscape, catering to diverse needs, preferences, and aspirations across various industries and domains.

Thanks for your interest in our solution.

Hope to work with your soon.

HOW TO USE
Operate The Solution

We will provide you with complete walkthrough over the shared screen call and explain all features in detail and make a video record of the same.

- **Confirm before you change**
  Please confirm with our team before you decide to make any vital changes to the system.

- **Never change configs**
  Please avoid changing any configurations or API settings into the system, it's important to keep the integrity of the system.

- **Backups**
  Please make backups of the system using internal backups from admin or from cpanel to ensure no data loss.

- **Feel free to ask**
  We are your Technology Partners, feel free to ask questions and we would love to help.

- **Rebranding**
  We do complete rebranding for your with your logo, app icons and color schemes. If we missed something let us know.

WARNING !

Please don't add or remove files from server or modify fields in database without discussion or any deep knowledge. Tampering the product will lead into termination of Tech Support.

TECH SUPPORT

We offer 60 Days of Tech Support from the date of deployment and we offer it through all our support channels. This is included with the purchase of the solution.

SCOPE OF TECH SUPPORT

For the complimentary 60 Days of tech support, we help you fix any bugs or configure any services which you are unable to do. This doesn't include backups, or customizations or server management. If you need any of those, please talk to us for our Annual Maintenance Packages.

LICENSE

Each solutions comes with one domain license only and we do the free deploy and install for the same. This is non-transferable and we are not responsible for migration of server or domain, unless agreed for extra cost.
