THE PROBLEM

Need for a Fiverr Clone Solution

In today's rapidly evolving digital landscape, businesses are continuously seeking efficient and scalable e-commerce platforms to expand their reach, streamline operations, and enhance customer experiences. Traditional e-commerce solutions often lack the comprehensive features and flexibility required to cater to diverse business models, multiple vendors, and varied product types. Recognizing these challenges, there is a pressing need for a modern, multi-faceted e-commerce solution like the Amazon Clone.

Key Challenges and Pain Points:

1. *Fragmented Vendor Management: Managing multiple vendors across different categories and product types becomes cumbersome with traditional e-commerce platforms, leading to inefficiencies and operational challenges.*
2. *Limited Customization and Flexibility: Many existing platforms offer limited customization options, making it difficult for businesses to adapt to changing market dynamics, customer preferences, and unique business models.*
3. *Inadequate Mobile Optimization: With the increasing shift towards mobile shopping, businesses require platforms that offer seamless mobile experiences. Traditional solutions often lack robust mobile optimization features, leading to potential revenue losses.*
4. *Complex Shipping and Logistics: Handling shipping responsibilities, managing multiple shipping methods, and ensuring timely deliveries are significant challenges. Existing platforms may not offer flexible shipping solutions tailored to individual business needs.*
5. *Diverse Payment Integration: As customers demand multiple payment options, including digital payments and cash on delivery, there is a need for platforms that seamlessly integrate with various payment gateways, ensuring secure and efficient transactions.*
6. *Lack of Comprehensive Analytics and Reporting: Business owners require real-time insights, analytics, and reporting tools to make informed decisions, optimize operations, and drive growth. Traditional platforms may lack advanced reporting capabilities, hindering business performance.*
7. *Inefficient Customer and Seller Management: Traditional e-commerce platforms often lack efficient tools for managing customers, sellers, and delivery personnel. This leads to operational inefficiencies, communication gaps, and potential customer dissatisfaction.*

Solving
Issues.

SOLUTION OVERVIEW
Technology meet Creativity.

To address these challenges and meet the evolving needs of modern e-commerce businesses, there is a significant demand for a comprehensive, feature-rich, and flexible e-commerce solution like the Amazon Clone. This platform offers:

- **Multi-Vendor Support:** Enables businesses to host multiple vendors across various categories, streamlining vendor management and expanding product offerings.
- **Customization and Scalability:** Provides extensive customization options, scalability, and flexibility to adapt to unique business models, market trends, and customer preferences.
- **Mobile Optimization:** Ensures seamless mobile experiences through cross-platform mobile app development, catering to the growing base of mobile shoppers.
- **Flexible Shipping and Logistics:** Offers robust shipping solutions, including in-house and seller-wise shipping options, customizable shipping methods, and efficient logistics management.
- **Diverse Payment Integration:** Seamlessly integrates with popular payment gateways, supporting digital payments, cash on delivery, and other payment options.
- **Comprehensive Analytics and Reporting:** Provides advanced analytics, reporting tools, and real-time insights to optimize operations, track performance, and drive business growth.
- **Efficient Customer and Seller Management:** Offers efficient tools for managing customers, sellers, and delivery personnel, enhancing communication, collaboration, and customer satisfaction.

CUSTOMIZEABLE.

In addition, the Naukri Clone is highly customizable, allowing businesses to tailor the platform to their specific needs and requirements. Whether it's adding new services, integrating with third-party systems, or customizing the user interface, the platform can be easily customized to meet the unique needs of each business.

KEY FEATURES
The Obvious

Key features of an Upwork Clone:

1. Multi-Vendor E-commerce System:
Enables multiple vendors to set up and manage their stores across various categories such as digital products, fashion, sports, and more.
Supports both single-vendor and multi-vendor business models, offering flexibility to businesses of all sizes.

2. PHP Laravel Framework:
Utilizes the PHP Laravel framework for developing the web frontend and admin panel, ensuring a robust, secure, and efficient system architecture.

3. Cross-Platform Mobile Development (Flutter):
Offers cross-platform mobile applications for users, sellers, and delivery personnel, ensuring compatibility with both iOS and Android platforms.

4. Admin Panel & Seller Panel:
Provides comprehensive web panels for admins and sellers, allowing efficient management of products, orders, payments, and other business operations.
Includes features such as business setup, commission management, product approval, customer management, and more.

5. Shipping Flexibility:
Offers flexible shipping options, including in-house and seller-wise shipping methods.
Allows customization of shipping methods based on categories, orders, products, and shipping costs.

6. Product Management (Digital & Physical):
Supports the listing and management of both digital and physical products.
Enables sellers to add, edit, and manage product listings, pricing, inventory, and shipping details.

7. Payment Integration:
Integrates seamlessly with popular payment gateways such as PayPal, Stripe, Razorpay, and more.
Supports multiple payment methods, including digital payments, cash on delivery, and other payment options.

8. Promotion and Marketing Tools:

Offers built-in tools for business promotion, including campaigns, banners, coupons, push notifications, and announcements.
Enables businesses to create and manage marketing campaigns, promotions, and offers to attract and retain customers.

9. Employee and Seller Management:

Provides comprehensive employee and seller management tools, allowing businesses to add, assign roles, and manage employees and sellers effectively.
Enables monitoring of seller activities, product listings, commissions, and withdrawals.

10. Customer and Seller Support:

Offers proactive customer and seller support through direct messaging, support tickets, and live chat features.
Ensures timely resolution of queries, issues, and concerns to enhance customer and seller satisfaction.

11. Multilingual Support:

Supports multiple languages and RTL (Right-to-Left) layouts, catering to a global audience and diverse customer base.

12. Analytics and Reporting:

Provides advanced analytics, reporting tools, and dashboards for monitoring sales, transactions, product performance, customer behavior, and more.
Enables businesses to gain insights, make informed decisions, optimize operations, and drive growth.

13. Security and Compliance:

Implements robust security measures, encryption protocols, and compliance standards to protect customer data, transactions, and sensitive information.
Ensures adherence to industry regulations, privacy policies, and best practices to maintain trust and credibility.

KEY BENEFITS

Here are some key benefits of a Zillow Clone:

1. Scalability and Flexibility:
Enables businesses to scale operations seamlessly, accommodate growing product catalogues, and adapt to changing market dynamics.
Offers flexibility to customize features, functionalities, and business models according to unique requirements and preferences.

2. Comprehensive Multi-Vendor Support:
Facilitates efficient management and collaboration among multiple vendors across diverse categories and product types.
Enables businesses to expand product offerings, reach new markets, and diversify revenue streams through a unified platform.

3. Robust Technology Stack:
Utilizes advanced technologies such as PHP Laravel for web development and Flutter for cross-platform mobile development, ensuring robust, secure, and efficient performance.
Leverages industry-leading frameworks and tools to provide a seamless user experience across web and mobile platforms.

4. Enhanced Customer Experience:
Offers a user-friendly interface, intuitive navigation, and seamless shopping experience for customers across devices and platforms.
Enables businesses to personalize customer interactions, recommend products, and enhance customer engagement through targeted marketing and promotions.

5. Efficient Operations Management:
Streamlines business operations, automates workflows, and enhances productivity through comprehensive admin and seller panels.
Provides tools for inventory management, order processing, shipping logistics, and payment reconciliation, reducing manual effort and operational costs.

6. Secure and Reliable Platform:
Implements robust security measures, encryption protocols, and compliance standards to protect sensitive data, transactions, and customer information.
Ensures high availability, reliability, and performance through scalable infrastructure, cloud hosting, and backup solutions.

7. Integrated Payment Solutions:
Facilitates seamless and secure transactions through integration with popular payment gateways, supporting diverse payment methods and currencies.
Enhances customer trust, convenience, and satisfaction by offering flexible and reliable payment options.

8. Advanced Analytics and Insights:
Provides comprehensive analytics, reporting tools, and dashboards to monitor performance, analyse trends, and gain actionable insights.
Enables businesses to make informed decisions, optimize marketing strategies, and maximize ROI through data-driven insights and recommendations.

9. Multilingual and Global Reach:
Supports multiple languages, currencies, and RTL layouts, catering to a global audience and expanding market reach.
Facilitates localization, internationalization, and global expansion strategies through tailored content, marketing campaigns, and customer experiences.

10. Proactive Support and Maintenance:
Offers dedicated customer support, technical assistance, and regular updates to ensure optimal performance, reliability, and security.
Provides ongoing maintenance, feature enhancements, and system updates to address evolving business requirements and industry trends.

11. Cost-Effective and Value-Driven:
Delivers a cost-effective solution with flexible pricing models, transparent pricing structures, and value-added features.
Enables businesses to achieve a faster time-to-market, lower total cost of ownership (TCO), and higher return on investment (ROI) through efficient operations and revenue generation strategies.

TECH STACK
Powerful & Flexible

1. Development Frameworks:
   - Web Frontend: Developed using the PHP Laravel framework, known for its robustness, security, and scalability.
   - Mobile Applications: Built using Flutter, a cross-platform development framework by Google, ensuring compatibility with both Android and iOS platforms.

2. Web Panels:
   - Admin Panel: Comprehensive web-based admin panel developed using Laravel, offering features such as business setup, analytics, user management, product management, and more.
   - Seller Panel: Dedicated web panel for sellers/vendors, allowing them to manage products, orders, payments, shipping, and other business operations efficiently.

3. Mobile Applications:
   - User App: A mobile application developed using Flutter, providing customers with a seamless shopping experience, product browsing, ordering, payment processing, and order tracking functionalities.
   - Seller App: Mobile application for sellers/vendors, enabling them to manage product listings, inventory, orders, payments, and customer interactions on the go.

4. Database Management:
   - Utilizes Relational Database Management Systems (RDBMS) such as MySQL, PostgreSQL, or similar databases to store and manage data efficiently.
   - Implements optimized database schemas, indexing strategies, and caching mechanisms to ensure high performance, scalability, and reliability.

5. Security Features:
   - Implements robust security measures, including data encryption, SSL/TLS encryption, firewall protection, and secure authentication mechanisms.
   - Adheres to compliance standards and privacy regulations to protect user data, transactions, and sensitive information.

6. Payment Integration:
- Integrates with popular payment gateways such as PayPal, Stripe, Razorpay, SenagPay, PayTabs, Paytm, and more.
- Supports digital payments, cash on delivery, and other payment methods through secure and reliable payment gateways.

7. Scalability and Performance:
- Designed with a scalable architecture, leveraging cloud hosting solutions such as AWS, Google Cloud, or Azure to accommodate growing user traffic, product catalogs, and business expansion.
- Implements caching mechanisms, content delivery networks (CDN), and load balancing techniques to ensure optimal performance, speed, and responsiveness.

8. User Interface and Experience:
- Offers a responsive design and mobile-optimized interface for seamless user experiences across devices, screen sizes, and platforms.
- Implements intuitive navigation, interactive elements, and user-friendly interfaces to enhance user engagement, satisfaction, and conversion rates.

9. Analytics and Reporting:
- Integrates advanced analytics tools, reporting modules, and dashboard features to monitor performance metrics, analyze trends, and gain actionable insights.
- Enables businesses to track sales, transactions, customer behavior, product performance, and other key metrics through real-time analytics and reporting functionalities.

10. Support and Maintenance:
- Provides ongoing support, maintenance, and updates to address technical issues, implement new features, and ensure optimal system performance.
- Offers documentation, training resources, and technical assistance to facilitate seamless implementation, integration, and operation of the Amazon Clone solution.

All the SDK & Codes Versions are updated as the year standards.

PROCESS FLOW
Know the Flow

1. Initial Setup and Configuration:
   - Administrator sets up the platform using the Admin Panel developed with PHP Laravel.
   - Configures business settings, commission rates, shipping methods, payment gateways, and other essential parameters.
   - Chooses between Single-Vendor vs. Multi-Vendor mode and enables necessary features like seller registration and product approval.

2. Seller Onboarding and Management:
   - Sellers register on the platform via the Seller Panel.
   - Administrators review and approve/reject seller registrations based on predefined criteria.
   - Approved sellers create and manage their storefronts, product listings, pricing, inventory, and shipping details.

3. Product Listing and Management:
   - Sellers add new products, specify product details, upload images, set pricing, and manage inventory.
   - Administrators review and approve/reject new product listings, ensuring quality, accuracy, and compliance with platform guidelines.
   - Customers browse products, view product details, read reviews, compare prices, and add products to their shopping carts.

4. Order Placement and Processing:
   - Customers place orders by adding products to their shopping carts, specifying delivery addresses, and choosing payment methods.
   - Sellers receive order notifications, prepare products for shipping, and update order statuses on the platform.
   - Administrators oversee order processing, coordinate between sellers and customers, and handle exceptions, returns, or refunds as necessary.

5. Payment Processing and Settlement:
   - Customers complete transactions using integrated payment gateways like PayPal, Stripe, or other supported methods.

- Administrators facilitate secure payment processing, ensure transaction integrity, and manage financial settlements between customers, sellers, and the platform.
- Sellers receive payments for fulfilled orders, deducting applicable commissions, fees, or charges as per the predefined terms.

6. Shipping and Delivery Management:
- Sellers manage shipping logistics, choose shipping methods, generate shipping labels, and coordinate with delivery partners or logistics providers.
- Administrators monitor shipping activities, track shipments, update delivery statuses, and resolve shipping-related issues or delays.
- Customers receive order confirmations, shipment notifications, tracking details, and updates on delivery timelines.

7. Customer Engagement and Support:
- Customers interact with sellers, administrators, or support representatives through integrated communication channels like live chat, email, or support tickets.
- Administrators provide proactive customer support, address inquiries, resolve complaints, and ensure customer satisfaction.
- Sellers engage with customers, respond to queries, provide product recommendations, and build long-term relationships through personalized interactions.

8. Analytics, Reporting, and Insights:
- Administrators access advanced analytics tools, reporting modules, and dashboards to monitor platform performance, analyze sales trends, track key metrics, and gain actionable insights.
- Sellers review performance metrics, sales reports, customer feedback, and product analytics to optimize strategies, improve offerings, and maximize profitability.
- Customers provide feedback, reviews, ratings, and recommendations, influencing product rankings, seller ratings, and overall platform reputation.

9. Maintenance, Updates, and Continuous Improvement:
- Administrators oversee platform maintenance, implement updates, and introduce new features, functionalities, or enhancements based on evolving business requirements, technological advancements, and user feedback.
- Sellers adapt to changes, leverage new tools, features, or opportunities, and collaborate with administrators to ensure seamless integration, operation, and growth.
- Customers benefit from improved experiences, enhanced features, and optimized processes, driving satisfaction, loyalty, and engagement on the platform.

INCLUSIONS
Know All You get

1. Multi-Vendor E-commerce Platform:
- Comprehensive platform that supports multiple vendors across various categories such as digital products, fashion, sports, home & living, health & beauty, and more.

2. Web and Mobile Applications:
- Web Panels: Admin Panel and Seller Panel developed using PHP Laravel.
- Mobile Applications: User App and Seller App developed using Flutter for cross-platform compatibility on both Android and iOS devices.

3. Business Setup and Configuration:
- Tools and features within the Admin Panel to configure business settings, commission rates, shipping methods, payment gateways, and other essential parameters.
- Flexibility to operate in Single-Vendor or Multi-Vendor mode, with options to enable/disable seller registration, product approval, and other key features.

4. Product Management and Listings:
- Comprehensive product management system for sellers to list, update, and manage product details, pricing, inventory, images, and descriptions.
- Approval workflows within the Admin Panel for reviewing, approving, or rejecting new product listings based on quality, accuracy, and compliance guidelines**.**

5. Order and Payment Processing:
- Seamless order placement, processing, and fulfillment system for customers, sellers, and administrators.
- Integration with popular payment gateways such as PayPal, Stripe, Razorpay, SenagPay, PayTabs, Paytm, and others for secure and efficient payment processing.

6. Shipping and Delivery Management:
- Integrated shipping and logistics management system with options for in-house or seller-wise shipping methods.
- Tools for sellers to manage shipping logistics, generate shipping labels, coordinate with delivery partners, and update order statuses.

7. Customer Engagement and Support:
- Built-in communication channels, support tickets, live chat, and email integration for proactive customer engagement and support.
- Features to manage customer inquiries, complaints, feedback, reviews, and recommendations to enhance satisfaction and loyalty.

8. Analytics, Reporting, and Insights:
- Advanced analytics tools, reporting modules, and dashboard features within the Admin Panel for monitoring platform performance, sales trends, key metrics, and actionable insights.
- Comprehensive reporting capabilities for sales and transactions, product performance, order statuses, shipping logistics, and customer behaviours.

9. Security, Compliance, and Maintenance:
- Robust security measures, encryption protocols, compliance standards, and privacy regulations to protect user data, transactions, and sensitive information.
- Ongoing maintenance, updates, technical support, documentation, training resources, and feature enhancements to ensure optimal performance, reliability, and user satisfaction.

10. Additional Features and Enhancements:
- Additional features such as employee management, multilingual support, business promotions, third-party API integrations (SMS, mail, ReCaptcha, Google map, push notifications), social media integration, gallery management, database cleaning, POS system, and more to enhance functionality, flexibility, and user experience.

APPS
Purpose & Functions

User App:

- Product Browsing: Users can browse through various categories, view product details, images, descriptions, reviews, and ratings.
- Search and Filter: Advanced search and filter options to help users find products based on specific criteria, keywords, brands, prices, etc.
- Shopping Cart: Users can add products to their shopping cart, manage quantities, view total prices, and proceed to checkout.
- Secure Checkout: Seamless and secure checkout process with multiple payment options, including digital payments, credit/debit cards, and cash on delivery.
- Order Tracking: Real-time order tracking, status updates, delivery timelines, and notifications for shipped, out for delivery, and delivered orders.
- Wishlist and Favourites: Users can add products to their Wishlist, save favourites, receive alerts for price drops, discounts, or availability.
- Account Management: User profiles, registration, login, password recovery, order history, return/refund requests, and personalized recommendations.

Seller App:

- Product Management: Sellers can list, update, manage products, pricing, inventory, images, descriptions, and specifications.
- Order Management: View and manage orders, order statuses, fulfilment, shipping details, and delivery updates.
- Payment Management: Track payments, settlements, commissions, fees, and financial transactions related to sales and revenue.
- Customer Communication: Respond to customer inquiries, messages, reviews, feedback, and provide customer support.
- Performance Analytics: Access performance metrics, sales reports, product analytics, customer behaviours, and insights to optimize strategies and operations.
- Inventory Management: Monitor inventory levels, stock availability, reorder points, and manage product listings effectively.

Admin Panel:

- Business Setup and Configuration: Configure platform settings, business models (Single-Vendor vs. Multi-Vendor), commission rates, shipping methods, payment gateways, and other essential parameters.
- User and Seller Management: Manage user profiles, seller registrations, approvals, permissions, roles, and access levels.
- Product Approval and Listings: Review, approve, or reject new product listings, ensure quality, compliance, accuracy, and enforce platform guidelines.
- Order Processing and Fulfillment: Monitor order statuses, coordinate between sellers and customers, handle exceptions, returns, refunds, and resolve disputes.
- Analytics and Reporting: Access advanced analytics tools, reporting modules, dashboards, sales trends, key metrics, performance insights, and actionable data.
- Security and Compliance: Implement robust security measures, encryption protocols, compliance standards, privacy regulations, and protect platform integrity.

Support
Line

Support channels offered by Miracuves:

1. **Whatsapp Chat Support:**
   Whatsapp is a popular messaging app that many people use to communicate with friends and family. Miracuves offers support through Whatsapp chat, which allows customers to quickly and easily ask questions or report issues. This channel is particularly useful for customers who prefer to communicate through messaging and prefer to avoid making phone calls. Whatsapp chat support can also be used for providing step-by-step guidance, sharing images or screenshots to help troubleshoot issues, or to provide quick updates.

2. **CRM & Tickets:**
   Miracuves uses CRM (Customer Relationship Management) software to manage customer interactions and track support requests. When a customer submits a support request through a ticketing system, it is assigned a unique ticket number that helps Miracuves track the issue from start to finish. This allows the company to respond quickly to customer inquiries, prioritize issues based on urgency or importance, and ensure that each request is handled efficiently.

3. **Emails:**
   Email is a traditional communication channel that many companies use to provide customer support. Customers can send an email to Miracuves with their inquiry or issue, and the company will respond via email. Email support is useful for customers who prefer a more detailed explanation of their issue, and who want to keep a written record of their interaction with the company. Email support also allows customers to attach screenshots or other files that can help explain their issue in more detail.

In summary, Miracuves offers a range of support channels to ensure that customers can get the assistance they need in the most convenient way possible. Each channel has its own benefits, and customers can choose the channel that works best for them.

FAQ
Let's clear it all

SPECIFICATION.

What technologies are used to develop Amazon Clone?
Amazon Clone is developed using PHP Laravel for the web frontend and admin panel, while the mobile applications are built using Flutter, ensuring a robust, secure, and cross-platform compatible solution.

What are the key components included in the Amazon Clone package?
The Amazon Clone package includes a Web frontend, Admin Panel, Seller Panel, User App, and Seller App. Additional features such as multiple themes, analytics tools, reporting modules, and customer support are also included.

Is the Amazon Clone solution customizable?
Yes, Amazon Clone offers flexibility and customization options to meet unique business requirements, including configuration settings, business models (Single-Vendor vs. Multi-Vendor), commission rates, shipping methods, payment gateways, and more.

How does the order fulfillment process work in Amazon Clone?
The order fulfillment process involves users placing orders through the User App, sellers managing product listings and orders via the Seller App, and administrators overseeing order processing, coordination, shipping, delivery, and customer support through the Admin Panel.

What payment methods are supported in Amazon Clone?
Amazon Clone integrates with popular payment gateways such as PayPal, Stripe, Razorpay, SenagPay, PayTabs, Paytm, and others, supporting digital payments, credit/debit cards, and cash on delivery options.

Is there a dedicated support system available for Amazon Clone users?
Yes, Amazon Clone provides active customer support, technical assistance, documentation, training resources, and regular updates to ensure optimal performance, reliability, and user satisfaction.

Can I add additional features or functionalities to the Amazon Clone solution?
Depending on your specific requirements, you may have the option to add additional features such as third-party API integrations, social media integration, gallery management, database cleaning, POS system, multilingual support, and more, to enhance functionality, flexibility, and user experience.

Is the Amazon Clone solution compatible with both Android and iOS devices?
Yes, the Amazon Clone mobile applications developed using Flutter are cross-platform compatible, ensuring seamless operation, performance, and user experience on both Android and iOS devices.

How does Amazon Clone ensure security, compliance, and data protection?
Amazon Clone implements robust security measures, encryption protocols, compliance standards, and privacy regulations to protect user data, transactions, sensitive information, and maintain platform integrity.

THE SUMMARY

Final Notes

The Amazon Clone solution stands as a robust multi-vendor e-commerce platform, meticulously crafted to consolidate various shops and stores under one digital umbrella. Utilizing sophisticated technologies like PHP Laravel for its web framework and Flutter for cross-platform mobile compatibility, this platform promises scalability and reliability across both web and mobile interfaces. The comprehensive package encompasses vital elements such as intuitive web panels for administrators and sellers, coupled with dedicated mobile apps for users and vendors, ensuring a seamless transactional experience for all parties involved.

One of the standout features of Amazon Clone is its adaptability. Whether businesses are looking to operate in a Single-Vendor or Multi-Vendor mode, this solution offers the flexibility to configure settings, manage product listings, oversee order processing, handle payments, and integrate various payment gateways. Furthermore, with a focus on user engagement and experience, Amazon Clone incorporates advanced analytics tools, customizable features, and dedicated customer support, empowering entrepreneurs and vendors to navigate the complexities of the e-commerce landscape effectively. In essence, Amazon Clone serves as a comprehensive and scalable solution, tailored to meet the diverse needs of online businesses, fostering growth, efficiency, and innovation in the ever-evolving digital marketplace.

Thanks for your interest in our solution.

Hope to work with your soon.

HOW TO USE
Operate The Solution

We will provide you with complete walkthrough over the shared screen call and explain all features in detail and make a video record of the same.

- **Confirm before you change**
  Please confirm with our team before you decide to make any vital changes to the system.

- **Never change configs**
  Please avoid changing any configurations or API settings into the system, it's important to keep the integrity of the system.

- **Backups**
  Please make backups of the system using internal backups from admin or from cpanel to ensure no data loss.

- **Feel free to ask**
  We are your Technology Partners, feel free to ask questions and we would love to help.

- **Rebranding**
  We do complete rebranding for your with your logo, app icons and color schemes. If we missed something let us know.

WARNING !

Please don't add or remove files from server or modify fields in database without discussion or any deep knowledge. Tampering the product will lead into termination of Tech Support.

TECH SUPPORT

We offer 60 Days of Tech Support from the date of deployment and we offer it through all our support channels. This is included with the purchase of the solution.

SCOPE OF TECH SUPPORT

For the complimentary 60 Days of tech support, we help you fix any bugs or configure any services which you are unable to do. This doesn't include backups, or customizations or server management. If you need any of those, please talk to us for our Annual Maintenance Packages.

LICENSE

Each solutions comes with one domain license only and we do the free deploy and install for the same. This is non-transferable and we are not responsible for migration of server or domain, unless agreed for extra cost.
