THE PROBLEM

Need for a Tinder Clone Solution

In today's digital age, the pursuit of meaningful connections and relationships has shifted significantly online. With the rapid growth and popularity of dating apps like Tinder, there's an evident demand for platforms that facilitate connections based on mutual interests, preferences, and attractions. However, while the market is vast, creating a dating platform from scratch involves significant time, resources, and technical expertise.

Challenges and Pain Points:

1. **Technical Complexity:** Developing a feature-rich dating application for multiple platforms (Android, iOS, and web) requires expertise in various technologies such as Android Studio, Xcode, Swift 5, PHP, and MySQL.
2. **User Expectations:** Modern users expect seamless experiences, real-time interactions, and a plethora of features that enhance their dating journey, from swiping profiles to personalized notifications.
3. **Safety & Moderation:** Ensuring user safety and maintaining a conducive environment requires robust admin functionalities. This includes monitoring conversations, moderating user-generated content, handling abuse reports, and managing advertisements.
4. **Monetization & Engagement:** Implementing effective monetization strategies, such as in-app purchases, virtual currencies, and ad placements, is crucial for sustaining the platform and ensuring user engagement without compromising user experience.
5. **Cross-Platform Compatibility:** With users accessing dating platforms from various devices and operating systems, there's a need for a responsive web version and consistent experiences across Android and iOS platforms.
6. **Management & Scalability:** As the user base grows, managing user accounts, interactions, content, and advertisements becomes increasingly complex. An efficient admin panel is essential for scalability and smooth operations.

**Solving
Issues.**

SOLUTION OVERVIEW

Technology meet Creativity.

The Tinder Clone is a comprehensive and sophisticated dating platform meticulously crafted to emulate the renowned Tinder experience while offering enhanced flexibility and customization options. Designed with a multi-platform approach, this solution seamlessly integrates across Android, iOS, and web environments, ensuring widespread accessibility and user engagement. By harnessing advanced technologies such as Object-Oriented PHP, MySQL, Android Studio, and Swift 5 within Xcode 11.3, the Tinder Clone provides a robust and scalable framework. This foundation enables users to effortlessly register, curate detailed profiles, explore potential matches through intuitive swiping mechanics, engage in real-time communication via messaging and video calls, and participate in a gamut of interactive features like gifting and advanced search functionalities.

Furthermore, the Tinder Clone distinguishes itself by prioritizing user safety, moderation, and satisfaction. Integrated with a suite of monetization strategies including in-app purchases, virtual currencies, and advertising avenues like AdMob, the platform offers entrepreneurs and businesses a lucrative opportunity to generate revenue while fostering user engagement. Complementing its user-centric features, the solution incorporates a comprehensive admin panel replete with analytics, reporting tools, and moderation controls. This ensures efficient platform management, user data protection, compliance adherence, and continuous optimization. In summary, the Tinder Clone encapsulates a turnkey solution tailored for aspiring entrepreneurs and businesses aiming to capitalize on the thriving online dating market, offering a harmonious blend of technological prowess, user engagement, safety protocols, and monetization opportunities.

CUSTOMIZEABLE.

In addition, the Tinder Clone is highly customizable, allowing businesses to tailor the platform to their specific needs and requirements. Whether it's adding new services, integrating with third-party systems, or customizing the user interface, the platform can be easily customized to meet the unique needs of each business.

KEY FEATURES

The Tinder Clone Solution is packed with a plethora of features designed to offer users a seamless, engaging, and personalized online dating experience. Here's a detailed breakdown of the key features:

User Interface & Experience:

1. Profile Management:

- Create and customize profiles with profile photos, cover images, and personal information.
- View and edit profile information, photos, and preferences.

2. Swiping & Matching:

- 'Hot or Not' swiping mechanism to indicate interest or disinterest.
- Matches feature to connect users who have expressed mutual interest.

3. Communication Tools:

- Real-time direct messaging with text, image, and video sharing capabilities.
- Agora Video Calls for face-to-face interactions and virtual dates.

4. Location-Based Features:

- 'People Nearby' feature to discover and connect with users based on geographical proximity.
- Advanced search filters to refine matches based on location, interests, age, and more.

Engagement & Monetization:

5. In-App Purchases & Virtual Currency:

- Offer virtual currency (credits) for in-app purchases, gifts, and premium features.
- Monetization strategies like Ghost Mode (Ad-free experience), Verified Badge, and Off Ads.

6. Notifications & Engagement:

- Personalized push notifications for profile likes, messages, gifts, friend requests, and more.
- Customizable notification settings to tailor user experience.

7. Gifts & Emoji Support:

- Send virtual gifts to express interest, appreciation, or celebrate milestones.
- Support for emojis in photos comments, gifts comments, and direct messages.

Safety & Moderation:**8. Abuse Reporting & Moderation:**

- Report inappropriate content, photos, or user behavior.
- Automated and manual moderation systems to monitor and manage user-generated content, conversations, and community guidelines.

9. Blocked List:

- Maintain a list of blocked users to manage interactions and ensure user comfort and safety.

Admin Panel Features:**10. User Management:**

- Accounts moderation system for managing user profiles, activities, and interactions.
- Edit user profiles, block/unblock users, and view personal user conversations.

11. Advertisement Management:

- Control AdMob banners for users and manage advertising strategies to optimize revenue.

12. Monitoring & Reporting:

- Real-time Messages Stream to monitor platform activity and user interactions.
- View abuse reports, support section, and detailed statistics to analyze platform performance and user behavior.

Additional Features:**13. Night Theme:**

- Offer a dark mode or night theme for users who prefer a darker interface.

14. Upgrades & Customizations:

- Provide users with options to upgrade their profiles, unlock premium features, and customize their dating experience.

15. Support & Assistance:

- Submit tickets to support from the application, ensuring users have access to assistance when needed.
-

KEY BENEFITS

Here are some key benefits of a Tinder Clone:

The Tinder Clone Solution offers a range of benefits for entrepreneurs, businesses, and users looking to capitalize on the burgeoning online dating market. Here's a comprehensive list highlighting the advantages of leveraging this ready-to-launch dating platform:

For Entrepreneurs & Businesses:

1. Rapid Deployment:

- Expedite the launch of your dating platform with a ready-to-deploy solution, saving time, resources, and development costs.

2. Scalability & Flexibility:

- Built on robust technologies like PHP and MySQL, ensuring scalability, performance, and flexibility to accommodate growing user bases and evolving business requirements.

3. Multi-Platform Presence:

- Establish a presence across Android, iOS, and web platforms, catering to a diverse user base and maximizing market reach.

4. Feature-Rich Solution:

- Access a comprehensive suite of features ranging from profile management, matching algorithms, communication tools, monetization options, and admin functionalities, enhancing user engagement and satisfaction.

5. Monetization Opportunities:

- Implement diverse monetization strategies like in-app purchases, virtual currency, premium features, and advertising, optimizing revenue streams and profitability.

6. User Acquisition & Retention:

- Offer users a seamless, engaging, and personalized dating experience, driving user acquisition, retention, and fostering brand loyalty.

7. Safety & Compliance:

- Leverage robust moderation systems, abuse reporting tools, and adherence to community guidelines, ensuring a safe, respectful, and compliant platform for users.

For Users:

8. Seamless User Experience:

- Enjoy a seamless and intuitive user experience across Android, iOS, and web platforms, enhancing accessibility, convenience, and satisfaction.

9. Diverse Feature Set:

- Access a wide array of features like profile customization, swiping & matching, real-time communication, virtual gifts, and advanced search filters, enhancing interaction and engagement.

10. Safety & Security:

- Benefit from robust safety measures, abuse reporting tools, and moderation systems, ensuring a secure, respectful, and enjoyable dating environment.

11. Personalized & Customizable:

- Personalize profiles, notifications, and user experiences based on preferences, interests, and interactions, enhancing relevance and satisfaction.

12. Engaging & Interactive:

- Engage in real-time interactions, video calls, and virtual gifting, fostering connections, relationships, and memorable experiences.

For Both:

13. Efficient Admin Management:

- Manage user accounts, interactions, content moderation, advertising, and analytics efficiently with a comprehensive admin panel, ensuring smooth operations, compliance, and performance monitoring.

14. Community Building:

- Foster a vibrant and inclusive community of users, facilitating connections, relationships, and memorable experiences, contributing to brand loyalty, growth, and success.

TECH STACK

Powerful & Flexible

The Tinder Clone Solution is built upon a robust and scalable architecture, leveraging modern technologies and frameworks to ensure optimal performance, reliability, and flexibility. Here's a detailed overview of the technical specifications underlying this comprehensive dating platform:

Platform & Development Environment:

1. Android Application:

- Developed using the latest version of **Android Studio**, ensuring compatibility, performance, and adherence to Android development best practices.

2. iOS Application:

- Built with **Xcode 11.3** and **Swift 5**, delivering a seamless, responsive, and intuitive user experience across iPhones and iPads.

3. Web Version:

- Responsive web application accessible across various operating systems, including Windows Mobile, iOS, and PC, ensuring consistent user experience and accessibility.

Backend & Database:

4. Backend Technology:

- Developed with **Object-Oriented PHP**, ensuring scalability, maintainability, and efficient server-side processing.

5. Database Management:

- Utilizes **MySQL database** for efficient data storage, retrieval, management, and scalability, ensuring data integrity, security, and performance.

Features & Functionalities:

6. Communication & Real-time Interaction:

- Integrated with **Agora Video Calls** for real-time face-to-face interactions, fostering connections and relationships.

- Enables real-time direct messaging with image and video sharing capabilities, enhancing user engagement and communication.

7. Monetization & Advertising:

- Implements **AdMob** for banner advertisements and rewarded video ads, optimizing revenue streams and enhancing user experience through relevant and targeted advertising.
- Supports in-app purchases, virtual currency (credits), and premium features like Ghost Mode, Verified Badge, and Off Ads, driving monetization and user retention.

8. Security & Compliance:

- Adheres to industry-standard security practices, encryption protocols, and compliance requirements to ensure user data protection, privacy, and platform integrity.
- Implements abuse reporting tools, moderation systems, and community guidelines to foster a safe, respectful, and compliant dating environment.

Admin Panel & Management:

9. Admin Panel Technology:

- Built with **Object-Oriented PHP**, ensuring a robust, scalable, and efficient administrative interface for managing user accounts, interactions, content moderation, and advertising.

10. Monitoring & Analytics:

- Provides real-time monitoring tools, analytics dashboards, and reporting functionalities to track platform activity, user behavior, engagement metrics, and performance indicators.

All the SDK & Codes Versions are updated as the year standards.

PROCESS FLOW

Know the Flow

The Tinder Clone Solution operates through a systematic and user-friendly process flow, facilitating seamless interactions, connections, and engagements between users. Here's a step-by-step breakdown of the process flow, detailing the user journey and platform functionalities:

1. User Registration & Profile Creation:

1.1. Sign Up/Log In:

- New users can sign up using their email address or opt for a quicker registration process via Facebook.
- Existing users can log in using their credentials, ensuring a personalized and secure user experience.

1.2. Profile Creation & Customization:

- Upon successful registration, users can create and customize their profiles, including uploading profile photos, cover images, personal information, preferences, and interests.
- Users can edit, update, or modify their profiles anytime, ensuring relevance, accuracy, and personalization.

2. Discover & Match:

2.1. Discover Profiles:

- Users can browse through a curated list of profiles, filtered based on location, interests, preferences, and compatibility metrics.
- The 'Hot or Not' swiping mechanism allows users to indicate interest or disinterest by swiping right (like) or left (pass).

2.2. Matching Algorithm:

- The platform's matching algorithm identifies and suggests potential matches based on mutual interests, preferences, location, and compatibility metrics.
- Users receive notifications upon mutual matches, fostering connections, interactions, and relationships.

3. Communication & Interaction:

3.1. Direct Messaging:

- Users can initiate real-time direct messaging with mutual matches, enabling seamless communication, conversation, and connection-building.
- The platform supports image and video sharing capabilities within messages, enhancing user engagement, and interaction quality.

3.2. Agora Video Calls:

- Users can initiate Agora Video Calls with mutual matches, facilitating face-to-face interactions, virtual dates, and relationship-building opportunities.
- The video call feature enhances user engagement, trust, and connection quality, fostering meaningful relationships and experiences.

4. Monetization & Engagement:

4.1. In-App Purchases & Virtual Currency:

- Users can explore and purchase in-app features, premium subscriptions, virtual gifts, and credits using the platform's virtual currency system.
- Monetization strategies like Ghost Mode, Verified Badge, Off Ads, and premium features enhance user engagement, satisfaction, and platform revenue.

4.2. Notifications & Engagement:

- Users receive personalized push notifications for profile likes, messages, gifts, friend requests, and platform updates.
- Customizable notification settings enable users to tailor their notification preferences, ensuring relevance, timeliness, and user satisfaction.

5. Safety, Moderation & Support:

5.1. Abuse Reporting & Moderation:

- Users can report inappropriate content, photos, or user behavior through the platform's abuse reporting tools.
- The platform implements robust moderation systems, automated filters, and community guidelines to maintain a safe, respectful, and compliant dating environment.

5.2. Support & Assistance:

- Users can submit tickets to support directly from the application, accessing assistance, guidance, and resolution for queries, issues, or concerns.

- The platform's support section provides resources, FAQs, and contact information, ensuring users have access to timely and relevant support.

In summary, the Tinder Clone Solution's process flow facilitates a seamless, intuitive, and engaging user experience, enabling users to register, create profiles, discover matches, initiate interactions, foster relationships, and engage with the platform's features effortlessly. By prioritizing user engagement, safety, customization, and monetization, it provides a comprehensive and user-centric dating platform tailored to meet the demands of the modern online dating landscape effectively.

INCLUSIONS

Know All You get

The Tinder Clone Solution encompasses a comprehensive set of features, functionalities, and components designed to provide a robust, scalable, and user-centric dating platform. Here's an overview of the inclusions and components incorporated within the Tinder Clone Solution:

1. Multi-Platform Applications:

- **Android Application:** Developed using the latest version of Android Studio, ensuring compatibility, performance, and seamless user experience across a wide range of Android devices.
- **iOS Application:** Built with Xcode 11.3 and Swift 5, delivering a responsive, intuitive, and feature-rich experience for iPhone and iPad users.
- **Web Version:** A responsive web application accessible across various operating systems, including Windows Mobile, iOS, and PC, ensuring consistent user experience, accessibility, and platform reach.

2. Backend Infrastructure:

- **Server-Side Development:** Built with Object-Oriented PHP, ensuring scalability, efficiency, and seamless integration with front-end applications.
- **Database Management:** Utilizes MySQL database for efficient data storage, retrieval, management, and scalability, ensuring data integrity, security, and optimal performance.

3. User-Centric Features & Functionalities:

- **Profile Management:** Enables users to create, customize, and manage profiles, including profile photos, cover images, personal information, preferences, and interests.
- **Matching & Discovery:** Implements a 'Hot or Not' swiping mechanism and sophisticated matching algorithm to facilitate connections based on mutual interests, preferences, location, and compatibility metrics.
- **Communication Tools:** Offers real-time direct messaging, Agora Video Calls, image sharing capabilities, and virtual gifting, enhancing user engagement, interaction quality, and relationship-building opportunities.

4. Monetization & Revenue Generation:

- **In-App Purchases:** Enables users to explore and purchase premium features, virtual gifts, credits, and subscriptions using the platform's virtual currency system.
- **Advertising & Promotion:** Integrates AdMob for banner advertisements, rewarded video ads, and monetization strategies like Ghost Mode, Verified Badge, Off Ads, and premium features to optimize revenue streams and user engagement.

5. Safety, Moderation & Support:

- **Safety Measures:** Implements abuse reporting tools, moderation systems, automated filters, and community guidelines to maintain a safe, respectful, and compliant dating environment.
- **Support & Assistance:** Provides users with the ability to submit tickets to support directly from the application, access resources, FAQs, and contact information, ensuring timely and relevant assistance, guidance, and resolution.

6. Admin Panel & Management Tools:

- **Admin Dashboard:** Offers a comprehensive admin panel with user management tools, content moderation, advertising controls, analytics dashboards, and reporting functionalities to monitor, manage, and optimize platform performance, user interactions, and revenue generation.

APPS

Purpose & Functions

The Tinder Clone Solution is equipped with a myriad of app functions that cater to various aspects of the user experience, interaction, management, and monetization. Here's a detailed breakdown of the core app functions encapsulated within the Tinder Clone Solution:

1. User Registration & Authentication:

- **Sign Up & Log In:** Users can register using email or Facebook authentication, providing a secure and personalized experience.
- **Profile Setup:** Users can create, edit, and manage their profiles, including uploading photos, setting preferences, and personalizing information.

2. Discovery & Matching:

- **Profile Exploration:** Users can browse through profiles, view photos, read bios, and explore details to identify potential matches.
- **Swiping Mechanism:** Implements a 'Hot or Not' swiping feature, enabling users to swipe right to like or left to pass profiles, facilitating mutual connections.
- **Matching Algorithm:** Utilizes advanced algorithms to suggest potential matches based on compatibility, interests, location, and user preferences.

3. Communication & Interaction:

- **Direct Messaging:** Facilitates real-time messaging between mutual matches, enabling seamless communication, conversations, and relationship-building.
- **Agora Video Calls:** Allows users to initiate video calls with mutual matches, fostering face-to-face interactions, virtual dates, and connection-building opportunities.

4. Monetization & Revenue Generation:

- **In-App Purchases:** Enables users to purchase virtual gifts, credits, premium features, subscriptions, and other in-app offerings using the platform's virtual currency system.
- **Advertising Integration:** Incorporates AdMob for displaying banner advertisements, rewarded video ads, and monetization strategies like Ghost Mode, Verified Badge, Off Ads, and premium features.

5. Safety, Moderation & Support:

- **Abuse Reporting:** Provides users with the ability to report inappropriate content, photos, behavior, or concerns, ensuring a safe, respectful, and compliant dating environment.

- **Moderation Systems:** Implements automated filters, moderation tools, and community guidelines to monitor, manage, and maintain platform integrity, safety, and quality.
- **Support & Assistance:** Enables users to submit support tickets directly from the app, access resources, FAQs, and contact information, ensuring timely and relevant assistance, guidance, and resolution.

6. Notifications & Engagement:

- **Push Notifications:** Sends personalized push notifications for profile likes, messages, gifts, friend requests, matches, updates, and platform activities, enhancing user engagement, retention, and interaction.
- **Customizable Notifications:** Allows users to customize notification settings, preferences, and alerts based on their preferences, ensuring relevance, timeliness, and user satisfaction.

7. Admin Management & Control:

- **User Management:** Provides admin with tools to manage user accounts, profiles, interactions, content moderation, and platform activities.
 - **Analytics & Reporting:** Offers admin dashboards, analytics tools, and reporting functionalities to monitor, analyze, and optimize platform performance, user engagement, revenue generation, and growth metrics.
-

Support Line

Support channels offered by Miracuves:

1. Whatsapp Chat Support:

Whatsapp is a popular messaging app that many people use to communicate with friends and family. Miracuves offers support through Whatsapp chat, which allows customers to quickly and easily ask questions or report issues. This channel is particularly useful for customers who prefer to communicate through messaging and prefer to avoid making phone calls. Whatsapp chat support can also be used for providing step-by-step guidance, sharing images or screenshots to help troubleshoot issues, or to provide quick updates.

2. CRM & Tickets:

Miracuves uses CRM (Customer Relationship Management) software to manage customer interactions and track support requests. When a customer submits a support request through a ticketing system, it is assigned a unique ticket number that helps Miracuves track the issue from start to finish. This allows the company to respond quickly to customer inquiries, prioritize issues based on urgency or importance, and ensure that each request is handled efficiently.

3. Emails:

Email is a traditional communication channel that many companies use to provide customer support. Customers can send an email to Miracuves with their inquiry or issue, and the company will respond via email. Email support is useful for customers who prefer a more detailed explanation of their issue, and who want to keep a written record of their interaction with the company. Email support also allows customers to attach screenshots or other files that can help explain their issue in more detail.

In summary, Miracuves offers a range of support channels to ensure that customers can get the assistance they need in the most convenient way possible. Each channel has its own benefits, and customers can choose the channel that works best for them.

FAQ

Let's clear it all

SPECIFICATION.

What platforms are supported by the Tinder Clone Solution?

The Tinder Clone Solution supports multiple platforms, including Android (developed using Android Studio), iOS (built with Xcode 11.3 and Swift 5), and a responsive web version accessible across various operating systems.

How is user data managed and stored?

User data is managed and stored securely using a MySQL database backend. The solution prioritizes data integrity, security, and compliance with relevant privacy regulations.

Can I customize the features and functionalities according to my business requirements?

Yes, the Tinder Clone Solution offers customization options to tailor features, functionalities, and designs based on your business requirements, target audience, and branding guidelines.

What monetization strategies are available with the Tinder Clone Solution?

The solution offers multiple monetization strategies, including in-app purchases, virtual currency (credits), premium features, subscriptions, AdMob banner advertisements, rewarded video ads, Ghost Mode, Verified Badge, and Off Ads.

How does the matching algorithm work?

The solution employs advanced algorithms to facilitate matches based on mutual interests, preferences, location, and compatibility metrics. Users are suggested potential matches based on these criteria, enhancing connection quality and relevance.

Is there a system in place for user safety, moderation, and compliance?

Absolutely. The Tinder Clone Solution prioritizes user safety, moderation, and compliance. It incorporates abuse reporting tools, automated filters, moderation systems, community guidelines, and admin controls to maintain a safe, respectful, and compliant dating environment.

How can users access support and assistance if needed?

Users can access support and assistance directly from the app by submitting support tickets, accessing resources, FAQs, contact information, and relevant assistance channels available within the platform.

Is the solution scalable to accommodate a growing user base?

Yes, the Tinder Clone Solution is built on a scalable architecture, leveraging robust technologies and frameworks like Object-Oriented PHP and MySQL. It can accommodate growing user bases, evolving business requirements, and increasing platform demands effectively.

Are there any analytics and reporting tools available for platform monitoring and optimization?

Yes, the solution offers comprehensive admin dashboards, analytics tools, and reporting functionalities to monitor, analyze, and optimize platform performance, user engagement, revenue generation, growth metrics, and other relevant KPIs.

How easy is it to install and deploy the Tinder Clone Solution?

The Tinder Clone Solution offers a straightforward and quick installation process for deploying the server-side components, ensuring rapid deployment, configuration, and launch of the platform with minimal technical complexities.

THE SUMMARY

Final Notes

The Tinder Clone Solution is a comprehensive and customizable dating platform designed to cater to the evolving needs of the online dating landscape. Built with a multi-platform approach, it offers seamless experiences across Android, iOS, and web versions, ensuring broad accessibility and user engagement. Leveraging advanced technologies like Object-Oriented PHP, MySQL, Android Studio, and Xcode 11.3 with Swift 5, the solution provides a robust, scalable, and feature-rich environment for users to register, create profiles, discover matches, initiate interactions, and foster relationships. With a myriad of functionalities, including advanced matching algorithms, real-time communication tools, monetization strategies, safety measures, and comprehensive admin management, the Tinder Clone Solution empowers entrepreneurs and businesses to capitalize on the growing online dating market effectively, efficiently, and competitively.

Furthermore, the Tinder Clone Solution prioritizes user-centricity, customization, and flexibility, allowing stakeholders to tailor features, designs, and functionalities according to specific business requirements, target audiences, and branding guidelines. By integrating monetization strategies like in-app purchases, virtual currencies, premium features, and advertising, it offers avenues for revenue generation while ensuring user engagement, satisfaction, and retention. Additionally, with robust safety measures, moderation systems, analytics tools, and support mechanisms in place, the solution maintains a secure, respectful, and compliant dating environment. In essence, the Tinder Clone Solution encapsulates a turnkey platform that combines technological excellence, user-centric design, monetization opportunities, and safety protocols, enabling stakeholders to establish, grow, and succeed in the competitive and dynamic online dating landscape.

**Thanks for your interest in
our solution.**

Hope to work with your soon.

GLOSSARY

MySQL	AdMob
Swift 5	Safety Measures
Xcode 11.3	Moderation Systems
User Registration	Admin Panel
Profile Management	Analytics
Swiping Mechanism	Reporting Tools
Matching Algorithm	Support Mechanisms
Real-time Communication	Customization
Messaging	User Engagement
Video Calls	Compliance

HOW TO USE Operate The Solution

We will provide you with complete walkthrough over the shared screen call and explain all features in detail and make a video record of the same.

- **Confirm before you change**
Please confirm with our team before you decide to make any vital changes to the system.
- **Never change configs**
Please avoid changing any configurations or API settings into the system, it's important to keep the integrity of the system.
- **Backups**
Please make backups of the system using internal backups from admin or from cpanel to ensure no data loss.
- **Feel free to ask**
We are your Technology Partners, feel free to ask questions and we would love to help.
- **Rebranding**
We do complete rebranding for your with your logo, app icons and color schemes. If we missed something let us know.

WARNING !

Please don't add or remove files from server or modify fields in database without discussion or any deep knowledge. Tampering the product will lead into termination of Tech Support.

TECH SUPPORT

We offer 60 Days of Tech Support from the date of deployment and we offer it through all our support channels. This is included with the purchase of the solution.

SCOPE OF TECH SUPPORT

For the complimentary 60 Days of tech support, we help you fix any bugs or configure any services which you are unable to do. This doesn't include backups, or customizations or server management. If you need any of those, please talk to us for our Annual Maintenance Packages.

LICENSE

Each solutions comes with one domain license only and we do the free deploy and install for the same. This is non-transferable and we are not responsible for migration of server or domain, unless agreed for extra cost.
