THE PROBLEM

Need for a TikTok Clone Solution

The digital landscape has witnessed a significant rise in the popularity of short-form video content, exemplified by platforms like TikTok. As users increasingly gravitate towards creating, sharing, and consuming short entertaining videos, there's a growing demand for platforms that can replicate or offer similar functionalities. The need arises from various aspects of user engagement, entertainment, and content creation in today's social media-driven world.

Identified Challenges and Requirements:

1. **Platform Limitations:** Existing social media platforms may not fully cater to the specific requirements and features that TikTok offers, such as audio dubbing, interactive filters, and seamless video sharing capabilities.
2. **User Engagement:** The TikTok model has proven highly effective in capturing user attention through its algorithm-driven newsfeed, personalized content recommendations, and interactive features. This level of engagement is challenging to replicate on other platforms without dedicated functionalities.
3. **Content Creation and Discovery:** Users seek platforms that provide easy-to-use tools for creating engaging content, discovering new videos, and interacting with a broader community. Traditional social media platforms may lack specialized features tailored for short-form video content creation and discovery.
4. **Monetization and Business Opportunities:** The success of TikTok has opened avenues for content creators, influencers, and businesses to monetize their content, collaborate with brands, and reach a global audience. A lack of similar platforms restricts these opportunities for users seeking alternative platforms.
5. **Technical Requirements:** Developing a TikTok-like platform from scratch requires substantial resources, technical expertise, and time investment. Businesses and developers looking to enter this space may seek ready-made solutions that offer customizable features, scalability, and integration capabilities.

Solving
Issues.

SOLUTION OVERVIEW

Technology meet Creativity.

The TikTok Clone Solution is a comprehensive social media platform designed to replicate the core functionalities, features, and user experience of the popular TikTok application. This solution offers a turnkey platform for businesses, developers, content creators, and users seeking to create, share, and discover short entertaining videos globally. Here's a detailed overview:

Technical Requirements:

- **Server & Hosting:** The solution requires PHP 7.0 and is compatible with VPS/Cloud hosting environments. Shared hosting is not supported.
- **Dependencies:** Ffmpeg must be installed to support video processing and playback functionalities.

Licensing & Deployment:

- Users have the flexibility to purchase an extended license and apply for a refund on Codecanyon, allowing for licensing flexibility and compliance.

Core Features & Functionalities:

1. **User Authentication & Profiles:**
 - Registration and login via phone numbers, email addresses, or social media accounts.
 - User profile management with privacy settings, followers/following lists, and profile views insights.
2. **Content Creation & Sharing:**
 - Video creation with audio dubbing, filters, text overlays, stickers, emojis, and adjustable playback speeds (1x, 2x, 3x).
 - Image uploads, video recording, and editing capabilities.
 - Video sharing, tagging, commenting, liking, and other interactive features.

3. Discovery & Engagement:

- Personalized newsfeed with algorithm-driven content recommendations.
- Video discovery through hashtags, titles, user profiles, and trending categories.
- Interactive features like live streaming, duets, stories, and playlists.

4. Communication & Interaction:

- In-app chat module with multimedia sharing options.
- Push notifications for user activities, live streaming, followers, messages, and other relevant events.
- Reporting functionalities for content moderation and user management.

5. Customization & Scalability:

- Admin panel for managing audio tracks, stickers, user reports, content moderation, and backend functionalities.
- Dark mode, light mode, and customizable themes for user interface.
- Extensible architecture to support future enhancements, integrations, and scalability requirements.

KEY FEATURES

The TikTok Clone is designed to replicate the core functionalities and features of the popular TikTok application, providing users with a comprehensive platform for creating, sharing, and discovering short entertaining videos. Here's a detailed breakdown of the features:

1. User Authentication & Profiles:

- **Registration & Login:** Users can register and log in using phone numbers, email addresses, or social media accounts.
- **Profile Management:** Users can manage their profiles, update information, set privacy settings, view followers/following lists, and monitor profile views.

2. Content Creation & Editing:

- **Video Creation:** Users can record custom music-dubbed video selfies, performances, and other content.
- **Audio Selection:** Users can select tracks from a library or upload their own for video dubbing.
- **Video Editing Tools:** Features like text overlays, stickers, emojis, drawings, adjustable playback speeds (1x, 2x, 3x), and image uploads enhance video customization.

3. Content Discovery & Interaction:

- **Personalized Newsfeed:** Algorithm-driven newsfeed showcases content based on user's followers, following, and trending posts.
- **Video Discovery:** Users can discover videos through hashtags, titles, trending categories, and user profiles.
- **Interactions:** Users can like, comment, share, tag, report, and engage with videos, creators, and the community.

4. Communication & Engagement:

- **In-App Chat:** Integrated chat module enables users to communicate, share multimedia content, and interact within the platform.
- **Push Notifications:** Users receive notifications for activities like followers, messages, live streaming, content updates, and other relevant events.

5. Live Streaming & Collaborations:

- **Live Streaming:** Users can broadcast live videos, choose public/private settings, invite friends/followers, and host duet live streaming sessions.
- **Multi-User Collaboration:** Features like duet live streaming enable two users to jointly host a stream, enhancing engagement and content collaboration.

6. Customization & Personalization:

- **Dark & Light Mode:** Users can toggle between dark and light modes for personalized viewing preferences.
- **Themes & Filters:** Various themes, filters, stickers, and visual effects allow users to customize their content and enhance visual appeal.

7. Monetization & Business Features:

- **Content Monetization:** Enhanced features for creators, influencers, and businesses to monetize content, collaborate with brands, and leverage advertising opportunities.
- **Analytics & Insights:** Users can access analytics, profile views, engagement metrics, and audience insights to optimize content strategy and performance.

8. Security & Moderation:

- **Privacy Settings:** Users can customize privacy settings, video visibility, duet options, and control content accessibility.
 - **Content Moderation:** Reporting functionalities, content guidelines, and moderation tools maintain content quality, safety, and community standards.
-

KEY BENEFITS

Here are some key benefits of a TikTok Clone:

The TikTok Clone solution offers a multitude of benefits, catering to various stakeholders including businesses, content creators, developers, and users. Here's a comprehensive list of the advantages provided by this clone solution:

1. Replication of Successful Model:

- **Proven Success:** Leveraging the proven success and popularity of TikTok, the clone provides a ready-made platform with established features and functionalities.
- **Time & Cost Efficiency:** Avoids the need to develop a platform from scratch, saving time, resources, and development costs.

2. Customization & Scalability:

- **Flexible Features:** Offers customizable features, themes, filters, and functionalities to align with specific branding, user preferences, and business requirements.
- **Scalability:** Built on a scalable architecture, allowing businesses and developers to expand, enhance, and adapt the platform according to evolving market trends and user demands.

3. Enhanced User Engagement:

- **Interactive Features:** Incorporates interactive elements like likes, comments, shares, duets, live streaming, and personalized newsfeeds to maximize user engagement, retention, and platform activity.
- **Content Discovery:** Facilitates content discovery through personalized recommendations, trending categories, hashtags, and user interactions, enhancing user experience and content visibility.

4. Monetization Opportunities:

- **Revenue Generation:** Enables content creators, influencers, and businesses to monetize content through advertising, sponsorships, collaborations, and other revenue-generating opportunities.
- **Advertising Platform:** Provides a platform for brands and advertisers to reach a global audience, target specific demographics, and leverage user-generated content for promotional activities.

5. Community Building & Networking:

- **Community Engagement:** Fosters community building, networking, and collaboration among users, content creators, influencers, and brands.
- **Social Integration:** Integrates social media accounts, sharing options, and interactive features to enhance connectivity, virality, and social sharing capabilities.

6. Content Creation & Innovation:

- **Creative Freedom:** Empowers users with tools, resources, and creative freedom to produce innovative, engaging, and high-quality content.
- **Content Variety:** Encourages diversity, creativity, and exploration through a wide range of content formats, genres, themes, and collaboration opportunities.

7. Security & Moderation:

- **Safety Measures:** Implements security protocols, privacy settings, content guidelines, and moderation tools to ensure a safe, respectful, and inclusive platform environment.
- **User Control:** Enables users to control their privacy settings, content visibility, interactions, and report inappropriate content or behavior.

8. Technical Support & Updates:

- **Continuous Improvement:** Offers technical support, updates, and maintenance services to address issues, optimize performance, and incorporate new features, enhancements, and innovations.
- **Compatibility & Integration:** Ensures compatibility with standard technologies, platforms, devices, and integration capabilities for seamless user experience and operational efficiency.

TECH STACK

Powerful & Flexible

The TikTok Clone is a comprehensive solution designed to replicate the functionalities and user experience of the popular TikTok application. Here are the technical specifications detailing the requirements, architecture, and components of the clone solution:

1. Server & Hosting Requirements:

- **Programming Language:** PHP 7.0 is essential for server-side scripting and backend development.
- **Hosting Environment:** Compatible with VPS (Virtual Private Server) or Cloud hosting solutions. Shared hosting is not supported due to resource-intensive requirements and scalability concerns.

2. Dependencies & Libraries:

- **Ffmpeg Installation:** Ffmpeg must be installed to support video processing, transcoding, playback, and multimedia functionalities.
- **Database Management System:** Utilizes a robust database system (e.g., MySQL, PostgreSQL) for data storage, management, retrieval, and scalability.

3. Development Framework & Tools:

- **Backend Framework:** Custom-built or utilizing popular PHP frameworks (e.g., Laravel, CodeIgniter) for backend development, API integrations, and server-side logic.
- **Frontend Technologies:** HTML5, CSS3, JavaScript, and modern frontend frameworks/libraries (e.g., React, Vue.js) for responsive design, user interface development, and client-side interactions.

4. API Integrations & Third-party Services:

- **Social Media Integration:** Enables OAuth authentication, social sharing, and connectivity with popular social media platforms (e.g., Facebook, Instagram, Twitter).

- **Payment Gateways:** Integrates secure payment gateways (e.g., Stripe, PayPal) for monetization, transactions, subscriptions, and in-app purchases.
- **Cloud Services:** Utilizes cloud storage solutions (e.g., Amazon S3, Google Cloud Storage) for media storage, content delivery, and scalability.

5. Security Measures & Compliance:

- **Encryption & Data Protection:** Implements SSL/TLS encryption, data encryption, secure authentication mechanisms, and compliance with data protection regulations (e.g., GDPR).
- **Firewall & Security Protocols:** Utilizes firewalls, intrusion detection systems, and security protocols to safeguard against vulnerabilities, attacks, and unauthorized access.

6. Scalability & Performance Optimization:

- **Load Balancing:** Implements load balancing techniques, clustering, and distributed computing to optimize performance, handle traffic spikes, and ensure high availability.
- **Caching & Content Delivery Network (CDN):** Utilizes caching mechanisms, CDN services, and optimization techniques to enhance speed, reliability, and user experience.

7. Development Environment & Version Control:

- **Development Tools:** Utilizes integrated development environments (IDEs) like Android Studio for native app development, code editors, debugging tools, and testing frameworks.
- **Version Control:** Implements version control systems (e.g., Git) for codebase management, collaboration, branching, merging, and continuous integration/continuous deployment (CI/CD) pipelines.

8. Compatibility & Cross-Platform Support:

- **Cross-Platform Development:** Offers native Android app development using Java/Kotlin in Android Studio, ensuring compatibility, performance, and optimal user experience across devices, screen sizes, and operating system versions.

All the SDK & Codes Versions are updated as the year standards.

PROCESS FLOW

Know the Flow

The process flow of the TikTok Clone outlines the sequential steps and interactions that users, administrators, and other stakeholders follow while utilizing and managing the platform. Here's a structured breakdown of the process flow:

1. User Registration & Authentication:

- Users initiate the process by registering on the platform using phone numbers, email addresses, or social media accounts.
- Upon successful registration, users receive authentication credentials and can log in to access platform features and functionalities.

2. Profile Creation & Customization:

- Users create and customize their profiles by adding personal information, profile pictures, privacy settings, and other relevant details.
- Users set preferences, privacy settings, and content visibility options according to their preferences and requirements.

3. Content Creation & Editing:

- Users navigate to the content creation section, where they can record videos, select audio tracks, apply filters, add text overlays, stickers, emojis, and other visual elements.
- Users utilize video editing tools, adjust playback speeds, incorporate multimedia elements, and finalize content according to creative preferences.

4. Content Sharing & Interaction:

- Users upload, share, and publish content on their profiles, enabling visibility, engagement, and interaction with the user community.
- Users engage with content by liking, commenting, sharing, tagging, reporting, and interacting with videos, creators, and other users.

5. Content Discovery & Personalized Feeds:

- Users explore content through personalized newsfeeds, trending categories, hashtags, and user-generated content.
- Users discover, search, and explore videos, creators, trends, and popular content based on preferences, interests, and engagement metrics.

6. Live Streaming & Collaborative Features:

- Users access live streaming features, initiate broadcasts, choose public/private settings, and engage with audiences in real-time.
- Users collaborate, host duet live streaming sessions, invite friends/followers, and participate in interactive, community-driven experiences.

7. Communication & Networking:

- Users utilize in-app chat modules, messaging functionalities, and communication tools to connect, interact, and engage with other users, creators, and community members.
- Users receive notifications, updates, alerts, and communication prompts related to followers, messages, interactions, and platform activities.

8. Monetization, Analytics & Business Features:

- Content creators, influencers, and businesses leverage monetization features, advertising opportunities, sponsorships, collaborations, and revenue-generating initiatives.
- Users access analytics, insights, performance metrics, audience demographics, engagement data, and business intelligence tools to optimize content strategy, marketing efforts, and platform performance.

9. Security, Moderation & Compliance:

- Users adhere to platform guidelines, community standards, content policies, privacy settings, and regulatory compliance requirements.
 - Users report inappropriate content, behavior, violations, and security concerns to administrators, moderators, and support teams for review, action, and resolution.
-

INCLUSIONS

Know All You get

The TikTok Clone is designed to replicate the core functionalities and user experience of the popular TikTok application. Here are the inclusions that define the features, components, and elements incorporated within the clone solution:

1. User Authentication & Management:

- User Registration via phone numbers, email addresses, or social media accounts.
- Secure login mechanisms, authentication protocols, and account management features.
- User profile creation, customization, privacy settings, and content management capabilities.

2. Content Creation & Editing Tools:

- Video recording, audio dubbing, filters, text overlays, stickers, emojis, and visual effects.
- Multimedia content integration, image uploads, video editing capabilities, and playback speed adjustments.
- Creative tools, editing features, content customization options, and interactive elements for content creation.

3. Content Discovery & Interaction:

- Personalized newsfeeds, trending categories, hashtags, and content recommendation algorithms.
- Content discovery mechanisms, search functionalities, and user engagement features.
- Interactive elements, social interactions, likes, comments, shares, tagging, reporting, and community engagement tools.

4. Live Streaming & Collaborative Features:

- Live streaming capabilities, broadcast functionalities, public/private settings, and real-time interactions.

- Multi-user collaborations, duet live streaming sessions, audience engagement tools, and interactive experiences.
- Hosting, participation, collaboration, and monetization opportunities within live streaming environments.

5. Communication & Networking:

- In-app chat modules, messaging functionalities, communication tools, and networking features.
- Notifications, alerts, updates, and communication prompts related to followers, messages, interactions, and platform activities.
- Community building, networking, collaboration, and social integration capabilities.

6. Monetization, Analytics & Business Features:

- Monetization opportunities, advertising platforms, sponsorship collaborations, and revenue-generating initiatives.
- Analytics, insights, performance metrics, audience demographics, engagement data, and business intelligence tools.
- Content monetization, user rewards, influencer partnerships, brand collaborations, and marketing opportunities.

7. Security, Moderation & Compliance:

- Security protocols, encryption mechanisms, data protection measures, and compliance with privacy regulations.
- Content moderation, community guidelines, reporting mechanisms, and user safety features.
- Compliance with legal requirements, regulatory standards, platform policies, and ethical practices.

8. Customization, Scalability & Technical Features:

- Customizable themes, user interfaces, features, functionalities, and branding options.
- Scalable architecture, performance optimization, load balancing, and technical infrastructure capabilities.
- Cross-platform compatibility, mobile responsiveness, device support, and user experience enhancements.

APPS

Purpose & Functions

The TikTok Clone encapsulates various app functions designed to emulate the user experience and functionalities of the original TikTok application. Here's a breakdown of the app functions included within the clone solution:

1. User Authentication & Onboarding:

- **User Registration:** Allows users to register using phone numbers, email addresses, or social media accounts.
- **Login & Logout:** Facilitates secure login and logout functionalities for user access.
- **Profile Creation:** Enables users to create, customize, and manage their profiles with personal information, privacy settings, and content preferences.

2. Content Creation & Editing:

- **Video Recording:** Provides tools for users to record videos, add audio tracks, and incorporate visual effects.
- **Editing Tools:** Offers functionalities for video editing, including filters, text overlays, stickers, emojis, and playback speed adjustments.
- **Content Customization:** Allows users to customize content, apply multimedia elements, and finalize video creations.

3. Content Discovery & Interaction:

- **Personalized Feeds:** Generates personalized newsfeeds based on user preferences, interests, and engagement metrics.
- **Content Search:** Facilitates content discovery through hashtags, trending categories, user profiles, and search functionalities.
- **Social Interactions:** Enables users to like, comment, share, tag, report, and interact with videos, creators, and the community.

4. Live Streaming & Collaboration:

- **Live Broadcasting:** Offers live streaming capabilities, broadcast functionalities, and real-time interactions.
- **Duet Live Streaming:** Allows users to host, participate, and collaborate in duet live streaming sessions with friends, followers, and other users.

- **Audience Engagement:** Facilitates audience engagement, interaction, and participation within live streaming environments.

5. Communication & Networking:

- **In-App Chat:** Integrates in-app chat modules, messaging functionalities, and communication tools for user interaction.
- **Notifications & Alerts:** Sends notifications, updates, alerts, and communication prompts related to platform activities, followers, messages, and interactions.
- **Community Building:** Fosters community building, networking, collaboration, and social integration among users, creators, and stakeholders.

6. Monetization & Business Features:

- **Content Monetization:** Enables content creators, influencers, and businesses to monetize content through advertising, sponsorships, collaborations, and revenue-generating initiatives.
- **Analytics & Insights:** Provides analytics, insights, performance metrics, audience demographics, engagement data, and business intelligence tools for optimizing content strategy, marketing efforts, and platform performance.
- **Advertising Platforms:** Integrates advertising platforms, sponsorship collaborations, brand partnerships, and marketing opportunities within the platform.

7. Security, Moderation & Compliance:

- **Security Measures:** Implements security protocols, encryption mechanisms, data protection measures, and compliance with privacy regulations to safeguard user information and platform integrity.
 - **Content Moderation:** Enables content moderation, community guidelines enforcement, reporting mechanisms, and user safety features to maintain a respectful and inclusive platform environment.
 - **Compliance:** Ensures compliance with legal requirements, regulatory standards, platform policies, and ethical practices to protect users, content creators, and stakeholders.
-

Support Line

Support channels offered by Miracuves:

1. Whatsapp Chat Support:

Whatsapp is a popular messaging app that many people use to communicate with friends and family. Miracuves offers support through Whatsapp chat, which allows customers to quickly and easily ask questions or report issues. This channel is particularly useful for customers who prefer to communicate through messaging and prefer to avoid making phone calls. Whatsapp chat support can also be used for providing step-by-step guidance, sharing images or screenshots to help troubleshoot issues, or to provide quick updates.

2. CRM & Tickets:

Miracuves uses CRM (Customer Relationship Management) software to manage customer interactions and track support requests. When a customer submits a support request through a ticketing system, it is assigned a unique ticket number that helps Miracuves track the issue from start to finish. This allows the company to respond quickly to customer inquiries, prioritize issues based on urgency or importance, and ensure that each request is handled efficiently.

3. Emails:

Email is a traditional communication channel that many companies use to provide customer support. Customers can send an email to Miracuves with their inquiry or issue, and the company will respond via email. Email support is useful for customers who prefer a more detailed explanation of their issue, and who want to keep a written record of their interaction with the company. Email support also allows customers to attach screenshots or other files that can help explain their issue in more detail.

In summary, Miracuves offers a range of support channels to ensure that customers can get the assistance they need in the most convenient way possible. Each channel has its own benefits, and customers can choose the channel that works best for them.

FAQ

Let's clear it all

SPECIFICATION.

What is TikTok Clone?

The TikTok Clone is a social media platform designed to replicate the functionalities, user experience, and features of the popular TikTok application. It provides businesses, developers, content creators, and users with a turnkey solution for creating, sharing, discovering, and monetizing short-form video content.

What are the key features of TikTok Clone?

The TikTok Clone includes features such as user authentication, content creation & editing tools, personalized feeds, content discovery mechanisms, live streaming capabilities, communication tools, monetization options, analytics, security measures, and compliance with privacy regulations.

Is the TikTok Clone customizable?

Yes, the TikTok Clone offers customization options, including customizable themes, user interfaces, features, functionalities, branding options, technical infrastructure, and cross-platform compatibility to meet specific requirements, preferences, and scalability needs.

What are the technical requirements for the TikTok Clone? The TikTok Clone requires PHP 7.0, VPS/Cloud hosting, Ffmpeg installation, and compatibility with standard technologies, platforms, devices, and integration capabilities. It is essential to adhere to technical specifications, server requirements, dependencies, and development frameworks for seamless operation and performance optimization.

How does the TikTok Clone handle security, moderation, and compliance?

The TikTok Clone incorporates robust security measures, encryption protocols, content moderation, community guidelines enforcement, reporting mechanisms, and compliance with privacy regulations to ensure user safety, platform integrity, and ethical practices.

Can users monetize content on the TikTok Clone?

Yes, content creators, influencers, and businesses can monetize content through advertising platforms, sponsorships, collaborations, brand partnerships, analytics, revenue-generating initiatives, and monetization opportunities available within the TikTok Clone platform.

Is technical support available for the TikTok Clone?

Yes, technical support, maintenance, updates, and continuous support are available for the TikTok Clone to address issues, optimize performance, ensure compatibility, and incorporate new features, enhancements, and innovations as per user feedback and requirements.

Is the TikTok Clone compatible with mobile devices?

Yes, the TikTok Clone offers cross-platform compatibility, mobile responsiveness, device support, and native app functionalities to ensure optimal user experience, performance, and accessibility across various devices, screen sizes, and operating systems, including Android and iOS platforms.

Can users collaborate and interact with others on the TikTok Clone?

Yes, users can collaborate, interact, engage, communicate, participate in live streaming sessions, host duets, follow other users, share content, comment, like, tag, report, and build communities within the TikTok Clone platform, fostering social interactions, networking, and community engagement.

How can businesses, developers, and content creators leverage the TikTok Clone?

Businesses, developers, and content creators can leverage the TikTok Clone to capitalize on the popularity, engagement, and market potential of short-form video content by creating unique platforms, enhancing existing ones, monetizing content, reaching a global audience, collaborating with influencers, and implementing innovative strategies tailored to user preferences, business objectives, and strategic goals in the competitive social media landscape.

THE SUMMARY

Final Notes

The TikTok Clone is a comprehensive digital platform meticulously designed to mirror the functionalities, user experience, and innovative features of the immensely popular TikTok application. Tailored for a diverse range of stakeholders, including businesses, developers, content creators, and end-users, this clone solution provides an all-encompassing environment for creating, sharing, discovering, and monetizing short-form video content. With a robust set of features spanning user authentication, content creation tools, personalized feeds, live streaming capabilities, communication channels, and monetization options, the TikTok Clone offers a turnkey solution to capitalize on the burgeoning demand for interactive, engaging, and viral video content.

Beyond its core functionalities, the TikTok Clone emphasizes customization, scalability, security, and compliance, ensuring a seamless and secure user experience while adhering to industry standards and regulatory requirements. By incorporating advanced technical specifications, integration capabilities, cross-platform compatibility, and continuous support mechanisms, the clone solution empowers stakeholders to leverage the platform's potential, foster community engagement, drive audience growth, and cultivate digital innovation in the competitive landscape of social media and content creation.

**Thanks for your interest in
our solution.**

Hope to work with you soon.

GLOSSARY

Authentication	Social Interactions
Content Creation	Community Guidelines
Personalized Feeds	Revenue Generation

HOW TO USE Operate The Solution

We will provide you with complete walkthrough over the shared screen call and explain all features in detail and make a video record of the same.

- **Confirm before you change**
Please confirm with our team before you decide to make any vital changes to the system.
- **Never change configs**
Please avoid changing any configurations or API settings into the system, it's important to keep the integrity of the system.
- **Backups**
Please make backups of the system using internal backups from admin or from cpanel to ensure no data loss.
- **Feel free to ask**
We are your Technology Partners, feel free to ask questions and we would love to help.
- **Rebranding**
We do complete rebranding for your with your logo, app icons and color schemes. If we missed something let us know.

WARNING !

Please don't add or remove files from server or modify fields in database without discussion or any deep knowledge. Tampering the product will lead into termination of Tech Support.

TECH SUPPORT

We offer 60 Days of Tech Support from the date of deployment and we offer it through all our support channels. This is included with the purchase of the solution.

SCOPE OF TECH SUPPORT

For the complimentary 60 Days of tech support, we help you fix any bugs or configure any services which you are unable to do. This doesn't include backups, or customizations or server management. If you need any of those, please talk to us for our Annual Maintenance Packages.

LICENSE

Each solutions comes with one domain license only and we do the free deploy and install for the same. This is non-transferable and we are not responsible for migration of server or domain, unless agreed for extra cost.
